Tradition and innovation – 167 years of KERN.

fast

- 24 hours delivery service – order today, on its way tomorrow
- Sales & service hotline from 8:00 am to 6:00 pm

competent

- DKD accreditation (DIN EN ISO/IEC 17025)
- QM system (DIN EN ISO 9001:2000)
- Initial verification by the manufacturer (90/384/EWG)
- Medical (DIN EN ISO 13485 & 93/42/EWG)

reliable

- 3 years warranty for balances over € 400,-
- Precision in weighing technology for the last 167 years

diverse

- One-stop shopping: from pocket balances through to floor scales – everything from one supplier
- Quick as a flash, find the product you want with the „Balance Quick-Finder“ at www.kern-sohn.com

KERN Pictograms

CAL INT Internal adjusting (CAL): Quick setting of the balance's accuracy with internal adjusting weight (motordriven).

CAL EXT Adjusting program (CAL): For quick setting of the balance's accuracy. External adjusting weight required.

PCS Piece counting: Reference quantities selectable. Display can be switched from piece to weight.

DATA Data interface: The type of interface is shown by the pictogram. See the glossary for further details.

GLP PROTOCOL GLP/ISO record keeping of weighing data with date, time and identification-no. Only with printers from KERN.

RECIPE Net-total weighing: weight of tare cup and weight of components memorized in two separate stores.

PERCENT Percentage determination: Displays the deviation from the reference weight (100%) in % instead of grams.

UNIT Weighing units: Can be switched to e.g. non-metric units at the touch of a key. See balance model. Please refer to KERN's website for more details.

TOL Weighing with tolerance range: Upper and lower limiting can be programmed individually, e.g. dosing/sorting.

IP Spray and dust protection IPxx The type of protection is shown by the pictogram. For details see the glossary.

MOVE Animal weighing program: Strong vibrations are filtered out to determine a stable weighing result.

INOX Stainless steel: the balance is protected against corrosion.

UNDER Suspended weighing: load support with hook on the underside of the balance.

BATT Battery operation: The battery type is specified for each device.

ACCU Rechargeable battery pack: rechargeable set.

230 V Mains adapter: 230V/50Hz in standard version for Germany. On request GB, AUS or USA version.

230 V Power supply: integrated in balance. 230V/50Hz in Germany. On request GB, AUS or USA version.

0.00 TARE Tare: put back displayed value to "0" during weighing process, e.g. to add or remove weighing material from a container.

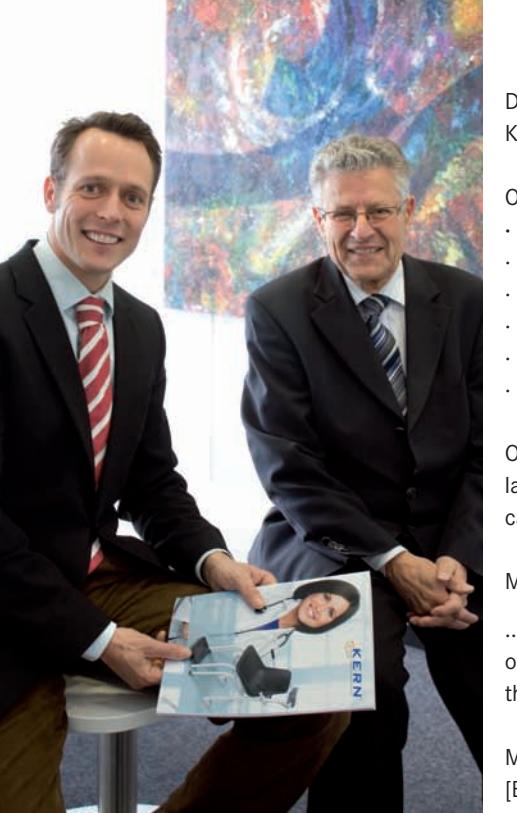

DAYS Package shipment via courier. **DAYS** Pallet shipment via freight forwarder.

3 YEARS GUARANTY Warranty: The warranty period is shown in the pictogram.

M +3 DAYS Verification possible. The time required for verification is specified in the pictogram.

DKD +3 DAYS DKD calibration possible. The time required for DKD calibration is specified in the pictogram.

[DMS] For details on weighing technologies, see the glossary.

Dear sales partner:
KERN weighing technology continues to impress – 2011 will be bigger and more innovative.

Our focal points for 2011 are:

- Laboratory balances for the next generation
- High-end moisture analyzers with Single Cell technology
- Industrial scales with innovative touchscreen operation
- Counting balances and counting systems
- Particularly cost-effective test weights
- DKD calibration for balances, test weights, force sensors, volumes

Our subsidiary SAUTER GmbH, Balingen, offers force measuring devices, hardness, thickness and layer thickness measuring devices, and associated testing services. See catalogue below. Orders can be placed via KERN's web shop.

More than 167 years of experience in precision scales ...

... and our close relationship with dealers is just as long. Working with us is easy and speed is one of our key features. Our commitment to satisfy our customers never stops. Perhaps this is one of the reasons why our roots can be traced so far back in history.

Martin & Albert Sauter, Management
(Balingen, January 2011)

Albert Sauter, Martin Sauter

High quality and reliable services for our customers. KERN – Professional measuring.

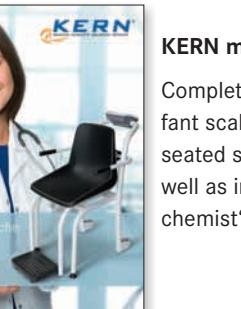

KERN – measuring technology and testing services from a single source

KERN main balances catalogue

Provides a complete overview of the KERN line of balances, test weights, and services.

KERN medical products catalogue

Complete line of medical scales, from infant scales to professional patient scales, seated scales and adiposity scales, as well as innovative manual force scales, chemist's scales, and veterinary scales.

KERN DKD calibration service brochure

Detailed information on topics pertaining to the calibration of balances, test weights, and force measuring devices.

SAUTER measuring equipment catalogue

Test instruments for industry and commerce, such as force, coating thickness, material thickness, and hardness measuring systems, as well as stroboscopes.

KERN branch prospectuses

Compact overview of the balance customers in an industry – just the balances your customers need!

NEWS 2011

Pocket carat balance TAB 20-3

High-precision pocket carat balance for jewellers, travelling salesmen ... [see page 10](#)

TAB only **€ 70,-**

Precision balance EMS

Entry level laboratory balance with large weighing plate ... [see page 15](#)

EMS from **€ 65,-**

Analytical balance ALJ-A

Precision and price down to a point - now with internal adjustment ... [see page 36](#)

ALJ from **€ 1.040,-**

Moisture analyser MLS 150-2A

Moisture analyser with 49 memory slots - now in a cost-effective 0.01 g variant as well ... [see page 40](#)

MLS only **€ 1.150,-**

Bench scale FKT

Touch-screen industrial scale with enormous range of features - now also in a cost-effective low-res variant ... [see page 54](#)

FKT from **€ 550,-**

Counting scale FTC

Quality counting balance with EC-Type Approval [M], counting resolution of 150.000 pts ... [see page 78](#)

FTC from **€ 820,-**

Platform scale IKT

The future begins here - touch-screen platform scale with enormous range of functions ... [see page 92](#)

IKT from **€ 780,-**

Statistics printer YKS-01

Cost-effective thermal printer for the most common statistical reports ... [see page 125](#)

YKS only **€ 390,-**

Moisture analyser DBS 60-3

High-quality moisture analyzer with enormous range of functions

COMING SOON...

PRICE REDUCTION

Already seen it??

In 2011, we're reducing prices on many of our models again. Current models at unbelievably low prices!

TAB	High-precision pocket carat balance for jewellers and travelling salesmen	10
CM-C	Compact pocket balance with carat display – ideal for jewellers	10

Precision in pocket format:

Pocket balances are the ideal helper whenever mobility and high precision are required. Since they have fewer keys, operation is simple and fast. Different weight units stored in the pocket balance, such as g, oz, ct, gn, etc., make them universally usable. An integrated calculator lets you use the weight measured immediately in calculations, e.g. a price, unit count, average values and many more. Compact in size and well protected with a flap or protective cover, which can be used as a convenient taring container, the pocket balance is always a useful tool for mobile weighing.

- In production, for inspection of production weights; during picking of small parts
- In quality control for quick testing of small parts like plastic parts from injection moulding machines, milled parts, screws, etc.
- In quality control for quick testing of small parts like plastic parts from injection moulding machines, milled parts, screws, etc.

- For mobile weighing, in on-site sampling, for fast analysis anywhere there's no power outlet.
- For hobbies and sports, for example for the loading of black powder, to weigh parts from construction sets, etc.
- In commerce, for the fast determination of the weights of coins, jewellery, precious stones, etc.
- In veterinary medicine for the weighing of small animals, the mixing of feed, etc.
- In the food area for the preparation of spice or tea mixes, for the weighing of food for dieting.

Of course, all KERN pocket balances can also be calibrated and delivered with a DKD calibration certificate (optional). This ensures the high level of accuracy of your balance.

Pocket balances TAB · CM-C

High-precision pocket carat balance for jewellers and travelling salesmen

01

KERN TAB

Features

- Simple and convenient 4-key operation
- Can be switched over from g to ct, gn at the touch of a key
- Hard case cover as protection against pressure and dust
- Adjusting weight and weighing pan included
- Ready for use: Batteries included, 4x 1.5V AAA, operating time approx. 150 h

Technical data

- Backlit LCD, digit height 9 mm
- Dimensions of weighing plate (plastic): 36x42 mm
- Overall dimensions WxDxH 95x133x33 mm
- Permissible ambient temperature 10°C / 30°C
- Net weight approx. 0,2 kg

Compact pocket balance with carat display - ideal for jewellers

KERN CM-C

Features

- Can be switched over from ct to g at the touch of a key
- Hard case cover as protection against pressure and dust
- Ready for use: Batteries included, 2x 1.5V AAA. AUTO-OFF function to preserve the battery, can be switched off
- Adjusting weight included
- ① Draft shield against air movements standard
- ② Weighing pan included

Technical data

- LCD display, digit height 9 mm
- Dimensions of weighing plate (plastic) WxD 50x40 mm
- Overall dimensions WxDxH 85x130x25 mm
- Net weight approx. 0,2 kg

2 Precision balances

KERN Model	Page
EMB Entry level laboratory balance with tremendous weighing performance	14
EMS Entry level model in the low cost range with large weighing plate	15
PFB Low-cost model based on a concept of easy use	16
440 The bestseller in basic laboratory balances	17
PCB The economical solution for the bargain hunter	18/19
PLE-N Low-cost precision balance with wide range of functions	20
KB-N Convenient model at a basic price, KB-M also with EC-Type Approval [M]	21
572 All-rounder e.g. as laboratory, counting or checking balance, 573 also with EC-Type Approval [M]	22
EWB Verifiable entry level model in the upper laboratory class with EC-Type Approval [M]	23
EW Verifiable gold & laboratory balance with EC-Type Approval [M]	24
PLJ-N Excellent performance & price, also with EC-Type Approval [M]	25
PLS Excellent performance, excellent price – PLJ now also with internal adjustment	26/27
EW-N Top of the range cost-effectiveness, EG-N with EC-Type Approval [M]	28/29
PES Robust laboratory and industrial precision balance, PEJ with EC-Type Approval [M]	30
Accessories laboratory and analytical balances	31
PBS Multifunctional laboratory balance with single-cell PBJ weighing system and EC-Type Approval [M]	32/33

Entry level laboratory balance with tremendous weighing performance

Features

- Ready for use: Batteries included. AUTO-OFF function to preserve the batteries, can be switched off
- Tare function facilitates formulation work
- Particularly flat design
- Secure and non-slip positioning with rubber feet

Options

- **I** Stainless steel-weighing plate (only for models with weighing plate sizes **B**), **KERN EMB-A02**, € 25,-
- Mains adapter (external) not included, can be reordered, **KERN 440-902**, € 15,-

Technical data

- Large LCD display, digit height 15 mm
- Dimensions of weighing plate (plastic):
A ø 82 mm
B ø 105 mm
C ø 150 mm, see larger picture
- Overall dimensions WxDxH 170x240x39 mm
- Net weight approx. 0,5 kg
- Permissible ambient temperature 5°C / 35°C

Price reduction

Entry level model with large weighing plate in the low-cost range

Features

- Large, shock proof plastic weighing plate
- Particularly flat design
- Ergonomic display device with large keys and a high-contrast LCD display
- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels

- Percentage determination: makes it possible to store a given weight value (100%) and to determine deviations from this target value
- Secure and non-slip positioning with rubber feet

Technical data

- Backlit LCD display, digit height 15 mm
- Dimensions of weighing plate (plastic): 160x160 mm
- Overall dimensions WxDxH 200x280x63 mm
- Optional battery operation, 9V Block, not included
- Mains adapter (external) included
- Net weight approx. 1,4 kg
- Permissible ambient temperature
- 5°C / 35°C

Low-cost model based on a concept of easy use

Features

- Concept of easy use: All primary functions have their own key on the keypad
- Compact size, practical for small spaces
- Capacity display: A bar lights up to show how much of the weighing range is still available
- Level indicator and foot screws to level the balance precisely, fitted as standard, to give the most accurate weighing results
- Only for models with weighing plate sizes **A**, **B**: Draft shield standard. Removable metal cover with pipette opening.

Weighing space WxDxH 158x143x64 mm

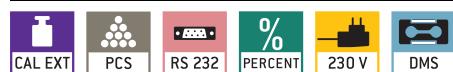

Options

- Standard printer, **KERN YKB-01N**, € 240,-
- Label printer, **KERN YKL-01**, € 650,-
- Statistics printer, **KERN YKT-01**, € 820,-
- Statistics printer, **KERN YKS-01**, € 390,-

Technical data

- Backlit LCD, digit height 15 mm
- Dimensions of weighing plate (stainless steel):
 - A** ø 80 mm
 - B** ø 120 mm
 - C** 155x145 mm, see larger picture
- Overall dimensions (without draft shield) WxDxH 200x257x87 mm
- Net weight approx. 2 kg
- Permissible ambient temperature 5°C / 35°C

02

The bestseller in basic laboratory balances

Features

- Only for models with weighing plate sizes **A**: Ring-shaped draft shield standard. Weighing space ØxH 90x40 mm
- UNITS: Further weighing units see the internet

Options

- Protective working cover over keyboard and housing, standard, can be reordered **€ 20,-** for models with weighing plate sizes
 - A KERN 440-210-002**
 - B KERN 440-330-002**
 - C KERN 440-450-002**
 - D KERN 440-530-002**
- Rechargeable battery pack internal, operating time approx. 12 h, charging time approx. 10 h, **KERN FCB-A01, € 35,-**
- Second display, **KERN YKD-A01, € 95,-**
- 1 Standard printer, KERN YKB-01N, € 240,-**
- Label printer with printout configuration and barcode function, **KERN YKL-01, € 650,-**
- 2 Statistics printer, KERN YKT-01, € 820,-**
- 3 Statistics printer, KERN YKS-01, € 390,-**

Technical data

- Backlit LCD display, digit height 15 mm
- Dimensions of weighing plate (stainless steel*):
 - A** ø 81 mm
 - B** ø 105 mm*
 - C** 130x130 mm*
 - D** 150x170 mm*, see larger picture
- Optional battery operation, 9V Block, not included. AUTO-OFF function to preserve the battery
- Overall dimensions (without draft shield) WxDxH 165x230x80 mm
- Net weight approx. 1 kg
- Permissible ambient temperature 5°C / 35°C

Low-cost precision balance with wide range of functions

Features

- Compact size, practical for small spaces
- Rechargeable battery pack internal, standard, operating time approx. 30 h, charging time approx. 10 h. Charge condition indicator on display
- Percentage determination: makes it possible to store a given weight value (100%) and to determine deviations from this target value
- Weighing with tolerance range (checkweighing): Input of an upper / lower limit value. A visual signal assists with portion division, dispensing or grading

- Weighing sum memory adds individual weighing results

- Only for models with weighing plate sizes **A**:
Ring-shaped draft shield standard.
Removable metal cover with pipette opening.
Weighing space ØxH 125x70 mm

Options

- **1** Standard printer, KERN YKB-01N, € 240,-
- **2** Statistics printer, KERN YKT-01, € 820,-
- **3** Statistics printer, KERN YKS-01, € 390,-

Technical data

- Backlit LCD, digit height 15 mm
- Dimensions of weighing plate (stainless steel):
 - A** ø 80 mm
 - B** ø 135 mm, see larger picture
- Overall dimensions (incl. draft shield): WxDxH 185x250x140 mm
- Net weight approx. 1,5 kg
- Permissible ambient temperature 10°C / 30°C

Precision balance KERN PLJ

02

Excellent performance at a very reasonable price,
with EC-Type Approval (M)

Features

- Automatic internal adjustment in the case of a change in temperature $> 3^{\circ}\text{C}$ or time-controlled every 3 hours
- Only PLJ-GM: Ergonomically optimised keypad for left and righthanded users
- 1** Draft shield standard (on all models with readout $d = 0,001 \text{ g}$). Weighing space WxDxH 140x140x65 mm
- Only PLJ-GM: Rechargeable battery pack internal, standard, operating time approx. 35 h, charging time approx. 12 h
- 2** only PLJ-GM: Weighing with tolerance range (checkweighing): Input of an upper / lower limit value. A visual signal assists with portion division, dispensing or grading

Options

- Protective working cover standard, can be reordered, **KERN ALS-A02**, € 20,-
- 3** Set for density determination of liquids and solids with density ≥ 1 , only suitable for models with readout $d = 0,001 \text{ g}$ (PLJ-N). The density is indicated directly on the display, sim. to illustration, **KERN PLS-A01**, € 530,-
- 4** Standard printer, **KERN YKB-01N**, € 240,-
- 5** Statistics printer, **KERN YKT-01**, € 820,-
- 6** Statistics printer, **KERN YKS-01**, € 390,-

Technical data

- Backlit LCD, digit height 17 mm
- Dimensions of weighing plate (stainless steel):
 - A** 128x128 mm
 - B** 195x195 mm, see larger picture
- Overall dimensions WxDxH without draft shield 206x335x85 mm incl. draft shield 206x335x157 mm
- Net weight approx. 3,6 kg
- Permissible ambient temperature 15°C / 30°C

Excellent performance, excellent price - now also with internal adjustment

Precision balance KERN PLS · PLJ

A

Features

- Dual range balances (D = Dual). The total weighing range is subdivided into 2 subranges and begins with a high resolution readout in the fine weighing range. If this range is exceeded the balance automatically switches to the higher weighing range with the lower resolution readout.
- **1** Ergonomically optimised keypad for left and righthanded users
- Glass draught guard, standard for models with weighing plate sizes **A**. Removable metal cover with pipette opening. Weighing space ØxH 150x60 mm
- **2** only PLJ: Automatic internal adjustment
- **3** only PLS: Adjusting program CAL, for quick setting of the balance accuracy, external test weights at an additional price
- UNITS: Further weighing units see the internet

1

Options

- Protective working cover standard, can be reordered, **KERN PLJ-A01**, € 25,-
- Hook for underfloor weighing to weigh hanging loads, **KERN PLJ-A02**, € 20,-
- **4** Standard printer, **KERN YKB-01N**, € 240,-
- **5** Label printer, **KERN YKL-01**, € 650,-
- **6** Statistics printer, **KERN YKT-01**, € 820,-
- **7** Statistics printer, **KERN YKS-01**, € 390,-

4

6

Technical data

- Backlit LCD, digit height 17 mm

New model

Top of the range cost-effectiveness, with EC-Type Approval [M]

Precision balance KERN EW-N · EG-N

02

Features

- Capacity display: A bar lights up to show how much of the weighing range is still available
 - Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
 - Weighing with tolerance range (check-weighing): Input of an upper / lower limit value. A visual signal assists with portion division, dispensing or grading
 - **① Only EG-NM:** Internal rotary adjustment control (CAL) on the side. Guarantees high degree of accuracy and makes the location irrelevant
 - **② Adjusting program (CAL),** for quick setting of the balance accuracy, external test weights at an additional price
 - Draft shield standard for models with weighing plate sizes **A.** Removable metal cover with pipette opening.
- Weighing space WxDxH 158x130x78 mm

Options

- Protective working cover over keyboard and housing, standard, can be reordered for models with weighing plate sizes **A, B KERN EG-A05, € 20,-**, **C KERN EG-A09, € 20,-**
- Rechargeable battery pack internal, operating time approx. 12 h, charging time approx. 12 h. Charge condition indicator on display. AUTO-OFF function to preserve the battery, can be switched off. For models with weighing plate sizes **A, B KERN EG-A04, € 100,-**, **C KERN EG-A06, € 100,-**
- **③ Large glass draught shield** with 3 sliding doors for easy access to the items being weighed, Weighing space WxDxH 150x140x130 mm, can be reordered for models with weighing plate sizes **A**, **KERN EG-A03, € 160,-**

- Loop for underfloor weighing, for models with weighing plate sizes **A, B KERN EG-A07, € 36,-**, **C KERN EG-A08, € 36,-**
- **④ Standard printer, KERN YKB-01N, € 240,-**

Robust laboratory and industrial precision balance, with EC-Type Approval [M]

Features

- Metal housing: robust and sturdy
- Weighing with tolerance range (checkweighing): Input of 2 upper and 2 lower limit values through 4 arrow keys. An acoustic signal assists with the portion division, dispensing or grading
- 1** Draft shield standard, Removable metal cover with pipette opening, on all models with readout d = 0,001 g. Weighing space WxDxH 170x150x100 mm
- 2** only PEJ: Automatic internal adjustment

- 3** only PES: Adjusting program CAL, for quick setting of the balance accuracy, external test weights at an additional price

Options

- Protective working cover standard, can be reordered (not for KERN PES 31000-1M), **KERN PES-A04**, € 20,-
- 4** Only PES: Rechargeable battery pack internal, operating time approx. 6 h, charging time approx. 15 h (internal charging with mains adapter), must be ordered at purchase, **KERN PES-A01**, € 560,-

- Relay output with 5 outputs for weighing result in 3 tolerance ranges, must be ordered at purchase, **KERN PES-A02**, € 440,-
- Label printer, **KERN YKL-01**, € 650,-
- 5** Standard printer, **KERN YKB-01N**, € 240,-
- 6** Statistics printer, **KERN YKT-01**, € 820,-
- 7** Statistics printer, **KERN YKS-01**, € 390,-

Technical data

- Fluorescent display bright with high contrast, digit height 12,5 mm
- Dimensions of weighing plate (stainless steel):
 - A** 140x120 mm
 - B** 200x200 mm, see larger picture
 - C** 250x220 mm
- Overall dimensions (without draft shield) WxDxH for models with weighing plate sizes
 - A** 220x333x93 mm
 - B** 220x333x93 mm
 - C** 260x333x110 mm
- Permissible ambient temperature 10°C / 30°C

KERN YBI-01

Ioniser to neutralise electrostatic charge

Features:

Goods to be weighed which are non-conductive, such as plastic, china, glass, etc often carry electrostatic charge. The electromagnetic field which then occurs between the goods to be weighed and the balance can cause the weighing result to be distorted by up to a gramme. Therefore, when weighing in milligrammes or even smaller increments, we recommend neutralising the electrostatic charge with the KERN AC-Korona discharge ioniser. With the mount supplied with the ioniser 1, 2, it can be positioned conveniently

next to the balance or you can manually direct it from all sides onto a particular item to be weighed 3.

02

Technical data:

- **Neutralisation:** ± 20V
- **Discharge of ozone:** 0,04 ppm/h
- **Dimensions:**
WxDxH 97x53x31 mm,
150x150x90mm incl. holder
- **Net weight:** approx. 0,11 kg
approx. 0,55 kg incl. mount
- **Mains connection:** 110-230V/50Hz,
AC power supply, 12V DC output

KERN YBI-01, € 820,-

KERN YKS-01

Statistics printer

Features:

for balances with RS 232 C data interface (see table on page 126). Quiet thermal printer with 0.75 lines/sec and max. 40 characters per line. GLP record keeping of balance adjustment with date and time print. Numerator; with statistical functions such as count and total of all measurements, minimum and maximum values of the main unit, range (Max-Min). Average value, standard deviations, available units: mg, g, kg, pcs. Language versions D, GB, F, PL.

Accessories:

Paper rolls (10 pcs.),
KERN YKB-A10, € 35,-
Compatible interface cable,
see page 126

Technical data:

- **Paper strip:** 112 mm wide.
- **Dimensions:**
WxDxH 165x140x50 mm.
- **Operation via mains adapter:**
230V/50Hz (standard).

Please state balance model, in order for printer to be preconfigured.
Price excluding interface cable,
KERN YKS-A01, € 390,-

KERN YPS-01

Weighing table

Features:

Accurate measuring results require stable working conditions! The KERN YPS-01 weighing table has been constructed to absorb vibrations and oscillations, which would otherwise distort the weighing result. The YPS-01 weighing table consists of:

- 4 Polished marble plate (49 kg) as integrated working surface, positioned on absorbing rubber components
- Work table with aluminium profile frame and height-adjustable feet

Technical data:

- **Overall dimensions**
WxDxH 800x600x782 mm
- **Dimensions marble plate:**
WxD 400x450 mm
- **Net weight:** approx. 77 kg

Dispatch complete on pallet.
Please ask for dimensions, gross weight, and shipping costs.

KERN YPS-01, € 740,-

Multifunctional laboratory balance with single-cell

Precision balance KERN PBS · PBJ

3

4

5

7

6

8

02

Features

- **1** only PBJ: Automatic internal adjustment in the case of a change in temperature or time-controlled at defined intervals
- Metal housing: robust and sturdy
- Dosage aid: High-stability mode and other filter settings can be selected
- Weighing with tolerance range (checkweighing): Input of an upper / lower limit value. A visual signal assists with portion division, dispensing or grading
- Totalizing of individual weighing results
- Simple recipeweighting and documenting with a combined tare/print function. In addition, the mixing ingredients for the recipe are numbered automatically and printed out with their corresponding number and weight value
- Identification number: 4 numeric positions, printed on calibration protocol
- Freely programmable weighing unit (e.g. display directly in special units such as length of thread g/m, paper weight g/m², or similar)

- Automatic data output to the PC/printer every time the balance is steady
- **2** only PBS: Adjusting program (CAL), for quick setting of the balance accuracy
- **3** Draft shield standard. Removable cover with pipette opening, on all models with readout d = 0,001 g, Weighing space WxDxH 184x203x90 mm
- UNITS: Further weighing units see the internet

Options

- Protective working cover over keyboard and housing, standard, can be reordered, **€ 20,-**, for models with weighing plate sizes
 - A** KERN PBS-A01

ABT	The premium model with single-cell weighing system	38

KERN Analytical balances with Single-cell cutting edge technology

To satisfy stricter requirements for precision, speed, and reproducibility of weight values, monolithic balance cells are increasingly the standard. These are measurement sensors for determination of weight that are fabricated from an aluminium block. These systems distinguish themselves from conventional balance cells in terms of both quality and performance:

- Higher measurement speed
- Better measurement precision
- Stable temperature behaviour

- Improved mechanical sturdiness
- Higher corner load reliability

KERN analytical balances on this measurement principle are designated as using „Single Cell Technology“.

To avoid relevant result variations when weighing with high-precision analytical balances, we recommend noting a few basic things:

- Daily adjustment, particularly if there are temperature variations, etc.
- Use of the internal automatic adjustment feature is strongly recommended
- Avoidance of air movement, e.g. open doors, windows, wind protection
- Use of a special weighing table, e.g. **KERN YPS-01**, p. 31
- Use of an ioniser to neutralise electrostatic charges on the items being weighed, e.g. **KERN YBI-01**, p. 31

Analytical balance KERN ALS · ALJ

03

Precision and price down to a point -
now with internal adjustment

Features

- Ergonomically optimised keypad for left and righthanded users
- Modern glass draft wind shield for optimal visibility of the weighing object
- Compact size, practical for small spaces
- Percentage determination: makes it possible to store a given weight value (100%) and to determine deviations from this target value
- Weighing with tolerance range, ideal for portion division, dispensing, grading
- 1** only ALJ: Automatic internal adjustment
- 2** only ALS: Adjusting program (CAL), for quick setting of the balance accuracy, external test weights at an additional price
- UNITS: Further weighing units see the internet

Options

- 3** Ioniser to neutralise electrostatic charge, **KERN YBI-01**, € 820,-
- 4** Weighing table to absorb vibrations and oscillations, which would otherwise distort the weighing result, **KERN YPS-01**, € 740,-
- 5** Standard printer, **KERN YKB-01N**, € 240,-
- 6** Label printer, **KERN YKL-01**, € 650,-
- 7** Statistics printer, **KERN YKT-01**, € 820,-
- 8** Statistics printer, **KERN YKS-01**, € 390,-

Technical data

- Backlit LCD, digit height 17 mm
- Dimensions of weighing plate ø 80 mm
- Overall dimensions (incl. draft shield): 210x340x330 mm
- Weighing space: 160x140x205 mm
- Net weight approx. 5,7 kg
- Permissible ambient temperature 5°C / 35°C

Analytical balance KERN ABT

03

The premium model with single-cell weighing system

Features

- Automatic internal adjustment in the case of a change in temperature $> 0,5^{\circ}\text{C}$ or time-controlled every 4 hours
- Dosage aid: High-stability mode and other filter settings can be selected
- Simple recipeweighting and documenting with a combined tare/print function. In addition, the mixing ingredients for the recipe are numbered automatically and printed out with their corresponding number and weight value
- Identification number: 4 numeric positions, printed on calibration protocol
- Automatic data output to the PC/printer every time the balance is steady

Options

- Protective working cover, standard, can be reordered, **KERN ABT-A02**, € 25,-
- 1** Set for density determination of liquids and solids, density is indicated directly on the display, **KERN ABT-A01**, € 640,-
- 2** Ioniser to neutralise electrostatic charge, **KERN YBI-01**, € 820,-
- 3** Weighing table to absorb vibrations and oscillations, which would otherwise distort the weighing result, **KERN YPS-01**, € 740,-

4 Moisture analysers

KERN Model		Page
MLS-A	Moisture analyser with 49 memories for individual drying processes	40
MLB-N	High standard in moisture analysis with graphic-assisted display	41
MLS-N	Moisture analyser with 99 memory possibilities and graphic display	42
MRS	Perfect drying with sample weight up to 124 g and many practical functions	43

Moisture analysing is an integral part of many raw and finished products and has a crucial influence on the quality of the product.

Moisture analysers are used particularly in the food industry, water resource management (sewage plants, etc.), plastics industry, agriculture and the energy industry (bio-energy plants, etc.).

Determining moisture requires a great deal of experience. Depending on the type of sample and the task involved, various drying processes are used.

KERN has concentrated on the most widely-used drying method: halogen drying, which brings many advantages:

- Even warming of the sample from above, without any risk of burning the surface of the sample

- Affordable purchase costs ensure rapid amortisation of the device
- Established temperature ranges from 30 - 230°C
- High measuring precision, up to 0.01 %
- Sufficient spare capacity, weighing range up to over 120 g
- Various drying programs (gradual drying, standard drying, stage drying, preheating stage (Boost))

The numerous memories of the KERN moisture analyser are particularly useful, as they hold information on the complete drying processes with drying parameters such as, for example, drying period, drying temperature, display settings, switch off criteria, etc... This saves an enormous amount of time and helps to achieve repeatable results.

- 9 Sample plates aluminium, Ø 92 mm. Unit of 80 pieces, **KERN MLB-A01, € 45,-**
- Round fiberglass filter e.g. for samples that splash or become encrusted. Unit of 80 pieces, **KERN RH-A02, € 65,-**
- Temperature calibration set consists of measuring sensor and display device, **KERN MLB-A11, € 250,-**
- Protective working cover standard, can be reordered, **KERN ALS-A02, € 20,-**
- Standard printer, **KERN YKB-01N, € 240,-**

Moisture analyser KERN MLS-N

04

Moisture analyser with 99 memory possibilities and graphic display

STANDARD		STANDARD	
CAL EXT	RS 232	GLP	PROTOCOL
230 V	230 V	NITS	FORCE
1 DAY	3 YEARS		

	MLS 50-3HA160N
Readout [d]	0,001 g / 0,01 %
Weighing range [Max]	50 g
Reproducibility, weight of sample 2 g	0,5 %
Reproducibility, weight of sample 10 g	0,02 %
Display after drying (Display can be switched over at any time)	
Moisture [%] = Weight loss (WL) from SW (startweight)	0 - 100 %
Dry mass [%] = Residual weight (RW) from SW	100 - 0 %
ATRO [%] [(SW - RW) : RW] · 100%	0 - 999 %
Residual weight [g]	Absolute value in [g]
Temperature range	50° - 160°C in steps up to 1°C
Drying modes	<ul style="list-style-type: none"> • <input type="checkbox"/> Standard drying • <input type="checkbox"/> Drying in levels • <input type="checkbox"/> Gentle drying • <input checked="" type="checkbox"/> Pre-heat level, can be switched on
Switch off criteria	<ul style="list-style-type: none"> • When the set time has expired (1 - 9 h 59 min) • When loss in weight per unit of time falls below the target value, both values can be adjusted ([mg/sec])
Recall of measurement	Interval adjustable from 1 sec - 99 sec (Also in combination with KERN YKB-01N printer or PC)
Overall dimensions WxDxH	210x335x156 mm
Net weight	ca. 6,3 kg
Price €, excl. of VAT, ex works	1550,-

Features

- Backlit Graphic display, digit height 14 mm
- 1 Moisture display in %
- 2 Current moisture content in %
- 3 Printer interval 30 sec
- 4 Printout in moisture %
- 5 Switch off mode
- 6 Type of drying Standard
- 7 Previous drying time
- 8 Status bar
- 9 Current temperature
- 10 Type of drying Standard
- 11 Target temperature
- 12 Drying process active
- Memory for automatic sequence of 99 complete drying processes.
12 free digits for each memory
- Net weighing assistance to a defined target value [g] with adjustable tolerance range 1% - 25% of the target value
- Simple „step-by-step“ user guidance in the display in the following languages German, English, French, Italian, Spanish, Polish
- Can be connected to PC keyboard
- 13 Halogenquartz glass heater 400 W
- The last value measured remains on the display until it is replaced by a new measurement
- 14 10 sample plates included
- Table of applications: There are many practical examples in the operating instructions

Options

- 14 Sample plates aluminium, Ø 92 mm.
Unit of 80 pieces, **KERN MLB-A01, € 45,-**
- Round fiberglass filter e.g. for samples that splash or become encrusted.
Unit of 80 pieces, **KERN RH-A02, € 65,-**
- Temperature calibration set consists of measuring sensor and display device, **KERN MLB-A11, € 250,-**
- Protective working cover standard, can be reordered, **KERN ALS-A02, € 20,-**
- Standard printer, **KERN YKB-01N, € 240,-**

Moisture analyser KERN MRS

04

Perfect drying with sample weight up to 124 g
and many practical functions

MRS 120-3	
Readout [d]	0,001 g / 0,01 %

FKB-M	also with EC-Type Approval [M]	52
FTB	A big hit in the industrial sector – robust and fast, with EC-Type Approval [M]	53
FKT	The future begins here – touchscreen industrial scale with enormous range of functions	54/55

Compact industrial weighing technology

Thanks to its compact dimensions, low weight, robust internal mechanism and the fact that it can be operated independent of mains power, bench scales can be used not only in a stationary situation, but also as mobile scales.

With weighing ranges between 3 kg - 60 kg, bench scales can cover a wide range of applications. Whether as a commissioning scale in the warehouse, for inventory purposes, on a production work station, in quality control, in small workshops, in service cars or in sales offices, bench scales are the first choice.

Durable stainless steel weighing plates, easy to read backlit displays, useful functions such as piece counting, manual tare - subtraction of a known container weight, or interfaces to PC and printer, all these support the user in their daily work.

Dual range and triple range scales have a particularly wide range of applications. With these scales, the total weighing range is subdivided into 2 or 3 subranges and begins with a high resolution read-out in the fine weighing range. If this range is exceeded the balance automatically switches to the higher weighing range with the lower resolution read-out.

The newest development for an even greater level of ease of use is intuitive touchscreen operation, which is being integrated into new KERN models.

KERN ECB

2

Easy, mobile and economical

Features

- **2** High mobility: Battery operation, compact, flat construction and low weight make this balance ideal for use in several locations (production, warehouse, dispatch department, ...)
- Particularly flat design
- Very fast display: steady weight values within 2 sec
- Simple and convenient 2-key operation
- Adjusting program CAL, external test weights at an additional price
- Optional battery operation, 6x 1.5V AA not included, operating time approx. 100 h

Options

- Rechargeable battery pack internal, operating time approx. 30 h, charging time approx. 10 h, **KERN PCB-A01, € 45,-**

Technical data

- Overall dimensions WxDxH 320x300x60 mm
- Permissible ambient temperature 5°C / 35°C

ECB:

- Backlit LCD display, digit height 14 mm
- Dimensions of weighing plate (stainless steel) WxD 320x260 mm
- Net weight approx. 1,7 kg

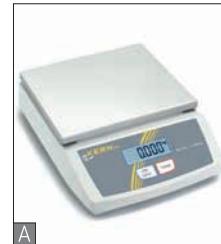

1 ECE:

- Large LCD display, digit height 14 mm
- Dimensions of weighing plate (plastic) WxD 320x260 mm
- Net weight approx. 1,5 kg

Bench scale KERN GAB-N

05

Application examples:

- Small industrial scale for pharmacies
- Hand mixtures of tea, coffee, chocolates
- Portion division of dough, meat, fish, poultry, mixed salads in cafeterias, etc.
- Weighing of fruits on site
- High-precision industrial applications

Price-performance-winner with EC-Type Approval [M]

Features

- Compact size, practical for small spaces
- High mobility thanks to battery operation with long operating time
- Weighing with tolerance range (checkweighing): Input of an upper / lower limit value. A visual signal assists with portion division, dispensing or grading
- Totalizing of counting operations

Options

- Rechargeable battery pack internal, operating time approx. 70 h, charging time approx. 12 h. Charge condition indicator using three-colour LED, **KERN GAB-A04**, € 40,-
- ① Standard printer, **KERN YKB-01N**, € 240,-

Bench scale KERN FKB-A

Large bench scale up to 65 kg with large weighing range

Features

- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels
- Freely programmable weighing unit (e.g. display directly in special units such as length of thread g/m, paper weight g/m², or similar)
- Optional battery operation, 9V Block, not included. operating time approx. 12 h
- UNITS: Further weighing units see the internet

Options

- Protective working cover over keypad, standard, can be reordered, **KERN FKB-A02, € 20,-**
- Rechargeable battery pack internal, operating time approx. 12 h, charging time approx. 10 h, **KERN PCB-A01, € 45,-**
- ① Second display, **KERN YKD-A01, € 95,-**
- ② Standard printer, **KERN YKB-01N, € 240,-**
- ③ Label printer with printout configuration and barcode function, **KERN YKL-01, € 650,-**
- ④ Statistics printer, **KERN YKT-01, € 820,-**
- ⑤ Statistics printer, **KERN YKS-01, € 390,-**

Technical data

- Large backlit LCD, digit height 25 mm
- Dimensions of weighing plate (stainless steel): 340x240 mm
- Overall dimensions WxDxH 350x390x120 mm
- Net weight approx. 6,5 kg
- Permissible ambient temperature 5°C / 35°C

* Only while stocks last

Price reduction

Large, high resolution bench scale, also with EC-Type Approval [M]

Features

- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels
- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- not for FKB-M: Freely programmable weighing unit (e.g. display directly in special

units such as length of thread g/m, paper weight g/m², or similar)

- Optional battery operation, 6x 1,5V Size C not included, operating time approx. 70 h

Options

- Protective working cover over keyboard and housing, standard, can be reordered, **KERN FKB-A02, € 20,-**

• not for FKB-M: Rechargeable battery pack external, operating time approx. 25 h, charging time approx. 10 h,

KERN KS-A01, € 170,-

The future begins here - touchscreen industrial scale with enormous range of functions

Easy input of text and values using large keypad

Clear menu structure with the keys labelled with plain text

Weighing with tolerance range (checkweighing): a visual and audible signal helps with portion division, dispensing or grading

40 memories for each mode, for checkweighing, pre-tare, reference weight, target weight when dispensing, etc.

Bench scale KERN FKT

1 Features

- **1 Innovative touchscreen:** Large touch-sensitive, backlit screen with very good contrast for easy operation and convenient reading
- Maximum transparency: All function keys are labelled with plain text which ensures that they are easily understood. The menu tree overlay in the info bar allows you to see at a glance which function is currently in use
- Intuitive menu structure which allows you to use the balance to the fullest of its functions, without wasting time. This speeds up the workflow and therefore saves time and money
- **2 Control outputs** (optocoupler, digital I/O) to connect relays, signal lamps, valves, etc. (35 V / 80 mA)
- **3 Only FKT-L:** Optional battery operation, 6x 1,5V Size C not included, operating time approx. 20 h
- Convenient recipe weighing: 5 recipes each with 7 components can be stored in plain text
- UNITS: Further weighing units see the internet

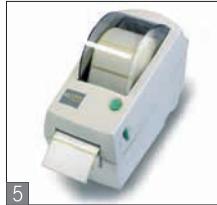

2 Options

- Protective working cover over keyboard and housing, standard, can be reordered, **KERN FKB-A02, € 20,-**
- Rechargeable battery pack external, operating time approx. 10 h, charging time approx. 10 h, **KERN KS-A01, € 170,-**
- **4 Standard printer, KERN YKB-01N, € 240,-**
- **5 Label printer, KERN YKL-01, € 650,-**
- **6 Statistics printer, KERN YKT-01, € 820,-**
- **7 Statistics printer, KERN YKS-01, € 390,-**

Technical data

- Backlit LCD graphic display with digit height 18 mm, screen diagonal 5.8"
- Dimensions of weighing plate:
 A 253x228 mm
 B 340x240 mm, shown in detail
- Overall dimensions for models with weighing plate sizes
 A 270x345x106 mm
 B 350x390x120 mm
- Permissible ambient temperature 10°C / 40°C

Modes

- Weighing
- Counting
- Dispensing
- Recipe weighing
- Checkweighing
- Totalizing with daily total
- Percentage determination
- Animal weighing
- Surface weight

Functions

- Capacity display
- Automatic taring
- Dispensing assistance (subtractive, additive)
- Net/Gross display, permanently on
- Variable reference quantity
- Automatic reference optimisation
- Tare deduction numerical or from the memory unit
- Input of item or batch description, operator etc.
- Freely programmable weighing unit (e.g. display directly in special units such as length of thread g/m, paper weight g/m², or similar)
- Date/time
- Statistical function
- GLP printout
- Individual printout configuration

FES	High resolution stainless steel model 65
FEJ	with EC-Type Approval [M] and IP65 protection

KERN balances - not scared of water at all !

Balances used in industrial situations are often subject to extreme stresses and strains. Water, oils, fats, varnish, dust, dirt, flour, small parts, etc. are all natural enemies of a balance. In industries such as the chemical, pharmaceutical, food, manufacturing industries, etc. balances must be able to cope with these stresses without this affecting their performance.

For use in such harsh environmental conditions, levels of protection are defined, which specify which environmental stresses a system can be exposed to in regards to the level of contact, foreign body and moisture protection, without causing damage to the unit. These levels of protection are described in the following standard: „DIN EN 60529: types of protection, housing“. The IP code usually consists of a two-digit combination, which gives the relevant level of protection, e.g. IP68. The first digit specifies the protection level for contact and protection against foreign bodies (protection against dust), the second digit is for the water and moisture protection (protection against splashes of water).

KERN stainless steel balances and balances with special IP protection will impress you with their sophisticated design coupled with high-quality material, robust construction and perfect finish. They have been specially developed for use in hygienically sensitive applications, amongst other applications. Cleaning is easy and hygienic because of the smooth upper surfaces and the materials used.

The weighing ranges of the models available with special level of protection range from 300 g - 300 kg and thereby cover the majority of applications in industry and food processing.

Extract:

KERN-Pictogram	1. Number	Specification	2. Number	Specification
	6	Dustproof	5	Designed for temporary contact with liquids. Use a damp cloth for cleaning.
	6	Dustproof	7	Designed for temporary use in wet areas. Can be cleaned with water jet. Temporary submersion is possible.
	6	Dustproof	8	Designed for continuous use in wet areas. Can be cleaned with water jet. Submersion is possible.

IP protected bench scale KERN WTB

Application examples:

- Portion division of dough, meat, fish, poultry, mixed salads in cafeterias, etc.
- Weighing of ingredients and seasonings in the catering trade, Hand mixtures of tea, coffee, chocolates
- Weighing of fruits on site, Filling of canned goods
- Pre-packed goods controlling scale

06

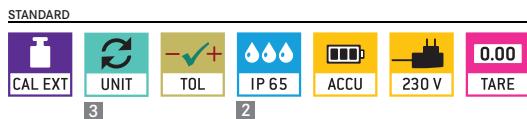

Ideal in the food industry - easy to clean, fast display, with EC-Type Approval [M]

Features

- Very fast display: steady weight values within 0.8 sec
- 1 Second display on the rear of the balance
- Housing made out of ABS plastic, smooth rounded surface for easy cleaning. Suitable for the ever-increasing hygienic requirements in the food industry
- Carrying grips on the underside of the scale for easy transportation
- Weighing with tolerance range (check-weighing): Input of an upper/lower limit value. A visual and audible signal assists with portion division, dispensing or grading
- Rechargeable battery pack internal, standard, operating time approx. 50 h, charging time approx. 15 h. AUTO-OFF function to preserve the battery
- 2 IP65: Protected against dust and water splashes (only when using rechargeable battery pack)
- 3 UNITS: Further weighing units see the internet (not for WTB-M)

Technical data

- Luminescent LED display, digit height 25 mm
- Dimensions of weighing plate (stainless steel): 230x180 mm
- Overall dimensions WxDxH 310x230x127 mm
- Net weight approx. 4,8 kg
- Permissible ambient temperature -10°C / 40°C

Stainless steel bench scale KERN FOB

Verifiable stainless steel balance with special protection against humidity with EC-Type Approval [M]

Features

- Stainless steel design of the housing and weighing plate. Its smooth surfaces make it simple to clean
- Increased protection against humidity by means of waterproof silicone sealing of the load cell, electronics and soldering joints
- High mobility: thanks to battery operation and compact, flat construction, it is suitable for use in several locations (production,

warehouse, dispatch department,...)

- Net/Gross weight: to control the consumed weighing range at the touch of a key

Options

- Protective working cover over keyboard and housing, standard, can be reordered, for models with weighing plate sizes
- A KERN FOB-A05, € 20,-**
- B KERN FOB-A06, € 20,-**

- Rechargeable battery pack internal, for weighing plate size

A operating time approx. 24 h, charging time approx. 8 h, **KERN FOB-A07, € 35,-**

B operating time approx. 30 h, charging time approx. 14 h, **KERN FOB-A08, € 35,-**

Technical data

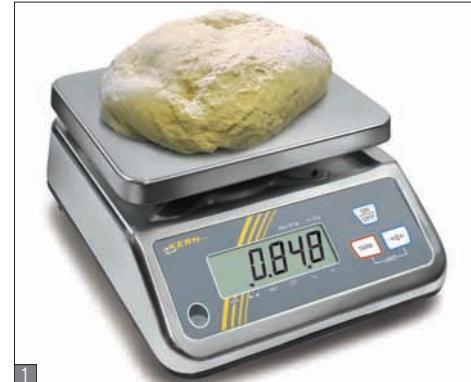

- Large LCD display, digit height 25 mm
- Dimensions of weighing plate (stainless steel):
 - A** 180x170 mm
 - B** 215x215 mm, see larger picture
- Overall dimensions WxDxH for weighing plate size
 - A** 190x250x55 mm
 - B** 220x305x80 mm
- Weighing plate **A** approx. 1,95 kg
Weighing plate **B** approx. 3,3 kg
- Permissible ambient temperature 0°C / 40°C

IP protected bench scale KERN FFN

**Robust, space-saving bench scale,
protected by stainless steel and IP67**

Features

- Stainless steel housing, rust-proof and easy to clean
- Level indicator and foot screws to level the balance precisely, fitted as standard, to give the most accurate weighing results
- Carrying grips on the underside of the scale for easy transportation
- IP67 protection: high level of protection against dust and water. Ideal for harsh

environmental conditions. Designed for temporary use in wet areas

- 1 Ideal for the food industry
- 2 Ideal for the robust industry
- UNITS: Further weighing units see the internet
- Ready for use: Batteries included, 4x 1.5V D. AUTO-OFF function to preserve the batteries, can be switched off. operating time approx. 600 h

Technical data

- Large LCD display, digit height 25 mm
- Dimensions of weighing plate (stainless steel): 230x190 mm
- Overall dimensions WxDxH 230x300x130 mm
- Net weight approx. 3,2 kg
- Permissible ambient temperature 0°C / 40°C

IP protected bench scale KERN FVN

Testing and grading balance with EC-Type Approval [M] and highest level of protection IP68

Features

- Stainless steel housing, rust-proof and easy to clean
- Carrying grips on the underside of the scale for easy transportation
- IP68 protection: highest class of protection against dust and water. Making it very robust and durable. Ideal for harsh ambient conditions. It is even possible that the balance can be submerged in water
- Robust weighing system, can even be used in refrigerated areas
- **1** Ideal for the food industry

- **2** Waterproof

• Ideal testing and grading balance:

Fill-to-target function: 99 programmable target weights. An audible and visual signal will be displayed when the target value is reached

Weighing with tolerance range (check-weighing): Input of an upper/lower limit value. A visual and audible signal assists with portion division, dispensing or grading

Classifying: Similar objects are automatically classified according to their weight into predetermined classes (up to 15 classes)

- Ready for use: Batteries included, 4x 1.5V D. AUTO-OFF function to preserve the batteries, can be switched off. Operating time approx. 1400 h

Technical data

- Large LCD display, digit height 30 mm
- Dimensions of weighing plate (stainless steel): 232x202 mm
- Overall dimensions WxDxH 242x292x122 mm
- Net weight approx. 3,5 kg
- Permissible ambient temperature -10°C / 40°C

Stainless steel platform scale with protection against dust and water splashes IP65

Features

- 1 Scale stainless steel, so it is easy to clean
- 2 IP65 protection (only when using rechargeable battery pack and without RS 232 usage)
- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels
- Dynamic weighing: The SET key enables you to obtain a stable weight when weighing animals or if weighing conditions are unstable
- Flexible positioning of display device: mounted onto the front, free-standing, mounted to the wall
- UNITS: Further weighing units see the internet

Options

- 3 Stand to elevate display device, height of stand approx. 480 mm, only for weighing plate size B, KERN NDE-A07, € 110,-
- Protective working cover over the display device, standard, can be reordered, KERN NDE-A01, € 20,-
- Rechargeable battery pack internal, operating time approx. 16 h, charging time approx. 12 h. AUTO-OFF function to preserve the battery, can be reordered, KERN NDE-A02, € 40,-
- Wall mount for the display device, KERN NDE-A05, € 75,-
- Mount to fasten the display device to the platform, only for weighing plate size B, KERN NDE-A06, € 95,-

Technical data

- Large backlit LCD display, digit height 25 mm
- Dimensions of weighing plate (stainless steel):
 - A 316x308x100 mm, shown in detail
 - B 522x406x125 mm
- Dimensions of display device WxDxH 225x115x45 mm
- Cable length of display device:
 - Weighing plate A approx. 2 m
 - Weighing plate B approx. 0,7 m
- Permissible ambient temperature 5°C / 35°C

Stainless steel platform scale KERN FES · FEJ

High resolution stainless steel model with EC-Type Approval [M] and IP65

Features

- **1** IP65: Protected against dust and water splashes (only when using rechargeable battery pack, without RS 232 usage, without usage of relay output)
- Weighing system fully encapsulated
- Display device and weighing plate made out of stainless steel
- Weighing with tolerance range (checkweighing): Input of 2 upper and 2 lower limit values through 4 arrow keys. An audible signal assists with the portion division, dispensing or grading
- Standby function when plugged in, automatic activation of the display will occur if a change of load is made or a key is pressed

- Data interface RS 232 (bidirectional, unidirectional)
- **2** only FEJ: Automatic internal adjustment
- **3** only FES: Adjusting program (CAL), for quick setting of the balance accuracy
- UNITS: Further weighing units see the internet

Options

- Protective working cover over the display device, standard, can be reordered, **KERN FEJ-A02, € 25,-**
- **4** Stand to elevate display device, height of stand approx. 710 mm, **KERN FEJ-A05, € 120,-**

- Device for suspended weighing, **KERN FEJ-A06, € 180,-**

Technical data

- Fluorescent display bright with high contrast, digit height 18 mm
- Dimensions of weighing plate (stainless steel): 350x400 mm
- Overall dimensions WxDxH 350x520x170 mm
- Net weight approx. 17 kg
- Cable length of display device approx. 1 m
- Permissible ambient temperature 0°C / 40°C

7 Price computing scales

KERN Model	Page
RXB Entry level model for your retail business, with EC-Type Approval [M]	67
RPB Retail scale and memories for article prices with EC-Type Approval [M]	68

Price computing scales are used anywhere where the price of goods is calculated dependent on the weight of the goods. These scales must be verified in accordance with European Directive 2009/23/EEC. Usually, these scales are in verification class III.

KERN mobile retail scales are compact in size and therefore save space on the sales counter. Thanks to the simple menu structure they are easy to use – saving time and money.

Fitted with mains, battery or rechargeable batteries as standard, price computing scales can be used in retail shops as well as on mobile sales stalls.

All price computing scales from KERN have three displays giving you all the important information at a glance:

- Weight displayed in kg (verifiable)
- Unit price in €/kg or €/100 g
- Total price in €

KERN entry level retail scales have direct access keys (PLU). The sales item with the relevant price can be stored against this PLU. In this way, frequently used sales items can be recalled as quick as a flash. This speeds up customer service and reduces waiting times.

For even more convenient solutions, the entry and maintenance of such item data can be carried out using easy-to-use, very convenient PC software and then transferred directly to the scale.

With the extensive functions for the production of check out reports, this PC software helps to take care of daily cashing up and detailed sales statistics, sorted according to items, operators, quantities, etc.

Price computing scale KERN RXB

**Entry level model for your retail business,
with EC-Type Approval [M]**

Features

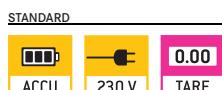

- **1** Elevated display backlit, revolving on column, height of stand approx. 540 mm, only RXB-HM, must be ordered at purchase
- **2** Second display on the rear of the balance (only with models without the elevated display)
- Unit price can be switched from €/kg to €/100g
- FIX key: Unit price can be stored for further weighings of the same article
- Energy management: Backlight turns off

after 5 sec, can be switched off

- Soil-resistant construction with water channels at the edge of the housing and sealing rings over the upper housing inlets
- Rechargeable battery pack internal, standard. Operating time up to 60 h, charging time approx. 8 h. Charge condition indicator using three-colour LED

Options

- Protective working cover over keyboard and housing, standard, can be reordered, **KERN CXB-A01, € 20,-**

Technical data

- Large backlit LCD displays digit height 18 mm
- Dimensions of weighing plate (stainless steel): 300x225 mm
- Overall dimensions WxDxH 300x330x110 mm
- Net weight approx. 4,4 kg
- Permissible ambient temperature -10°C / 40°C

Application examples:

- retail shops
- market places
- farm shops
- pick your own fruit and vegetable sales

CME Easy to use, self-explanatory counting scales, CKE counting resolution up to 361,000 pt	74
CDE Simple counting scale for heavy loads with counting resolution of 15,000 pt	75
CXP High capacity professional model, counting resolution of 60,000 pt	76
CDS Industrial counting scale with laboratory accuracy, counting resolution up to 300,000 pt	77
FTC Premium counting scales, CWS counting resolution up to 175,000 pt	78
CDEE Counting system with simple operation, counting resolution from 750,000 pt	79
CCS Counting the smallest parts in the largest quantities, counting resolution from 300,000 pt	80

Counting, doing it right!

In order to be able to count correctly, you must take a few parameters into account when you first start to consider selecting a counting scale.

Smallest part weight „PW min“

This is the smallest piece weight the scale will accept for piece counting and displaying piece count. In practice, however, depending on the required accuracy, using higher numbers of parts is recommended for the smallest counted parts, see „Smallest reference weight“.

Counting resolution

Describes the maximum quantity which can be counted with a counting accuracy of 1%, with the minimum variation of item weights and a sufficiently large reference quantity (20 pieces with counting resolution \leq 60,000 points, 50 pieces from 60,000 - 150,000 points, 100 pieces \geq 150,000 points). This is therefore a measure of the quality of the counting scale.

Recommended reference quantity

The weight tolerances of the pieces to be counted are the largest sources of error when counting. Therefore, at the start of every counting procedure, establish an average weight, the so-called reference weight, by placing several pieces on the scale, the so-called reference quantity.

Usually this would be:

- 5 pieces >> often sufficient
- 10 pieces >> common practise
- 20+ pieces >> with large range of piece weights

The „automatic reference optimisation“ function increases the reference quantity in levels, whereby the average piece weight is optimised step by step. This contributes considerably to the accuracy of the subsequent counting processes.

Smallest reference weight

Without automatic reference optimisation:

5 x PW min >> for low level requirements

10 x PW min >> common practise

20+ x PW min >> recommended value with large range of piece weights

With automatic reference optimisation:

2 x PW min >> generally sufficient

Which counting scale for which application?

Simple counting scale

with self-explanatory user guidance on the keyboard. The graphics control panel enables you to start working immediately, without having to study the user manual. Easy handling, value for money.

Professional counting scale

with 3 separate displays for reference weight (average weight of the pieces), total weight of all pieces and total piece count of all pieces. Integrated memories are very useful, e.g. for container weight, item number, reference weight as well as audible and visual counting assistance and an alphanumeric key pad for easy data entry.

A special tip for counting large quantities: Counting systems

The weighing ranges of bench counting scales are often not sufficient to count large quantities, units, items on pallets, etc. This is where high-performance counting systems come into their own, as these combine a high-precision reference balance with a high-capacity bulk scale.

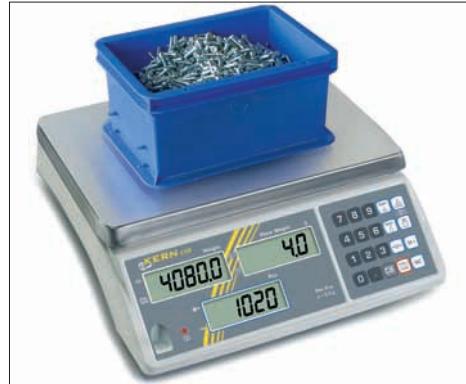

Counting scales / Counting systems

Counting scale KERN CXB

Entry level model in professional counting, also with EC-Type Approval [M], counting resolution of 30,000 Pt

Features

- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- Programmable using numerical key pad: known reference weight required reference quantity
- Audible Fill-to-target: target quantity or target weight can be programmed. When the target value is reached, a signal will sound
- Counting results memory: adds up all individual counting operations, result is shown in total weight and total pieces

- Rechargeable battery pack internal, standard. Operating time approx. 60 h, charging time approx. 8 h. Charge condition indicator on display
- Energy management: Backlight turns off after 5 sec
- Soil-resistant construction with water channels at the edge of the housing and sealing rings over the upper housing inlets
- PRE-TARE function for manual subtraction of a known container weight, which can be saved

Options

- Protective working cover over keyboard and housing, standard, can be reordered, **KERN CXB-A01, € 20,-**

Technical data

- Large backlit LCD displays digit height 18 mm
- Dimensions of weighing plate (stainless steel): 300x225 mm
- Overall dimensions WxDxH 300x330x110 mm
- Net weight approx. 4 kg
- Permissible ambient temperature -10°C / 40°C

Counting scale KERN CPB

similar image

The economical model, also with EC-Type Approval [M],
counting resolution of 60,000 Pt

08

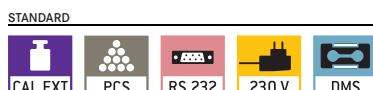

Features

- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- Programmable using numerical key pad: required reference quantity known reference weight
- Target piece input check-weighing with an audible signal
- Counting results memory: adds up all individual counting operations, result is shown in total weight and total pieces
- Audible Fill-to-target: target quantity or target weight can be programmed. When the target value is reached, a signal will sound

- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- High mobility:** thanks to battery operation, compact, flat construction and low weight, it is suitable for use in several locations (production, warehouse, dispatch department,...)

Options

- Rechargeable battery pack internal, operating time approx. 50 h, charging time approx. 14 h, **KERN GAB-A04**, € 40,-
- Standard printer, **KERN YKB-01N**, € 240,-
- Label printer, **KERN YKL-01**, € 650,-

Technical data

- Large LCD, digit height 20 mm
- Dimensions of weighing plate (stainless steel): 275x225 mm
- Overall dimensions WxDxH 315x355x110 mm
- Net weight approx. 4 kg
- Permissible ambient temperature 0°C / 40°C

Counting scale KERN CFS

Professional counting balance with 100 item memories and second balance interface, counting resolution 60,000 points

Features

- Memory (PLU) for 100 items with additional text, reference weight, tare weight e.g. of a container
- Weighing with tolerance range (checkweighing), ideal for portion division, dispensing, grading
- Programmable using numerical key pad: required reference quantity, known reference weight
- Fill-to-target function: Programmable target weight. An audible and visual signal will be displayed when the target value is reached

- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- Interface for second balance to construct a high-resolution counting system, e.g. with balances from the ITS, ITT series (see page 91/92) or weighing bridges (see page 109)

Options

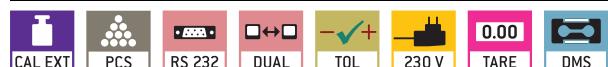

- Rechargeable battery pack internal, operating time approx. 60 h, charging time approx. 14 h, **KERN GAB-A04**, € 40,-
- Protective working cover over keyboard and housing standard, can be reordered, **KERN CFS-A02**, € 10,-

- Standard printer, **KERN YKB-01N**, € 240,-
- Label printer, **KERN YKL-01**, € 650,-

Technical data

- Large backlit displays digit height 20 mm
- Dimensions of weighing plate WxDxH 320x230 mm
- Overall dimensions WxDxH 320x330x125 mm
- Net weight approx. 3,8 kg
- Permissible ambient temperature 0°C / 40°C

KERN CKE

**Easy to use, self-explanatory counting balances,
counting resolution up to 361,000 points**

Technical data

- Two balances in one: Switching from counting mode to weighing mode at the touch of a button
- Self-explanatory graphic control panel, even without operating instructions, the counting process can be understood immediately. No learning time = reduces costs, ideal for untrained users, visualised process means that operating errors are avoided
- The 4 steps are carried out from left to right:
 - 1 Place the empty container onto the weighing plate and tare by pressing the TARE key
 - 2 Place the reference quantity for the goods to be counted into the container (5, 10, or 20 pieces)

3 Confirm the selected reference quantity by pressing the key (5, 10 or 20)

4 Pour in the goods to be counted. The number of pieces will immediately be shown on the display

CME:

- Optional battery operation, 9V Block not included. AUTO-OFF function to preserve the battery

CKE:

- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- Optional battery operation, batteries 6x 1,5V Size C not included. operating time approx. 70 h

Counting scale KERN CXP

High capacity professional model with a resolution of 60,000 points

08

Features

- Two balances in one: Switching from counting mode to weighing mode at the touch of a button
- **1** Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- Audible Fill-to-target: target quantity or target weight can be programmed. When the target value is reached, a signal will sound
- Programmable using numerical key pad: required reference quantity known reference weight
- PRE-TARE function for manual subtraction of a known container weight, which can be saved

- Counting results memory: adds up all individual counting operations, result is shown in total weight and total pieces
- Energy management: Backlight turns off after 5 sec, can be switched off
- **2** Display device can be detached, Cable length of display device approx. 0,4 m
- Rechargeable battery pack internal, operating time approx. 200 h without backlight, charging time approx. 8h. Charge indicator: green = charged, red = almost empty
- Memories for 10 Pre-tare or Fill-to-target values
- UNITS: Further weighing units see the internet

Options

- Protective working cover display device, standard, can be reordered, **KERN CXP-A01**, € 20,-

Counting scales KERN CWS · FTC

KERN CWS

KERN FTC

Premium counting scales suitable for verification [M],
counting resolution up to 175,000 points

Features

CWS:

- Clever user guidance thanks to blinking LED: Step-by-step, supported by visual signals on the keys
- **1** Display device can be detached
- Programmable using numerical key pad: required reference quantity, known reference weight, Reference using ID number
- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels
- Audible Fill-to-target:
When you are getting close to the target quantity (e.g. 20 pieces), then this is also supported by an audible signal which becomes more intense
In intermittent mode, a target quantity (e.g. 20 pcs.) can be counted several times

for repeated counting operations
(e.g. 20, 40, 60, 80 pcs.)

FTC:

- Robust metal housing
- Automatic taring when placing a container, saves time
- Capacity display: A bar lights up to show how much of the weighing range is still available

Options

- Standard printer, **KERN YKB-01N**, € 240,-
- Label printer, **KERN YKL-01**, € 650,-
- Statistics printer, **KERN YKT-01**, € 820,-
- Statistics printer, **KERN YKS-01**, € 390,-

CWS:

- Rechargeable battery pack internal, operating time approx. 80 h, charging time approx. 15 h, **KERN CWS-A01**, € 40,-

FTC:

- Rechargeable battery pack internal, operating time approx. 30 h, charging time approx. 6 h, for models with weighing plate sizes
- B KERN FTB-A05**, € 320,-
- C KERN FTB-A06**, € 320,-
- **2** Interface for second balance to construct a counting system, **KERN FTC-A01**, € 390,-
- **3** Ethernet interface, **KERN FTB-A09**, € 410,-
- **2** **3** Only one optional interface may be installed at any one time

Technical data

- Permissible ambient temperature -10°C / 40°C

CWS:

- Large LCD displays digit height 18 mm

Counting system KERN CDEE

KERN CDE

KERN CME

Self-explanatory control panel with graphics:

- 1 Place the empty container on the weighing plate of the quantity scale and tare using the TARE key
- 2 Place the reference quantity onto the reference balance (e.g. 5, 10, or 20 pieces)
- 3 Confirm the selected reference quantity by pressing the key (5, 10 or 20)
- 4 Pour the goods to be counted into the container on the quantity scale. The number of pieces will immediately be shown on the display

Counting system with simple operation with a resolution of 750,000 points

Features:

A counting system which is particularly intuitive to use, consisting of a KERN CDE bulk scale and KERN CME reference balance.

Multi-purpose use:

Each balance can be used individually. Switching from counting mode to weighing mode at the press of a button

CDE bulk scale

This is parts counting at a high degree of precision. For details see page 75, can be delivered separately.

- Battery operation possible
- Second data interface as standard, e.g. for printer connection

CME reference balance

It is ideal for accurately measuring the piece weight (= reference or count weight). The reference balance is linked to the bulk balance using the interface cable. For details see page 74, can be delivered separately.

- Battery operation possible
- KERN CDE-A01 **interface cable**, included, cable length approx. 1.5 m

Options:

CDE:

- Rechargeable battery pack, internal, operating time approx. 15 h, charging time 10 h, **KERN FCB-A01, € 35,-**
- Protective working cover as standard, can be reordered, **KERN CDE-A02, € 20,-**

CME:

- Rechargeable battery pack, external, operating time approx. 230 h, charging time 10 h, **KERN KS-A01, € 170,-**
- Standard printer with individual header data configuration, **KERN YKB-01N, € 240,-**
- Label printer with printout configuration and barcode function, **KERN YKL-01, € 650,-**

For all printers see page 125

Technical data:

CDE:

- Weighing plate
- A** WxDxH 315x305x85 mm (Fig.)
- B** WxDxH 522x408x125 mm

CME:

- Weighing plate
- A** Ø 105 mm (Fig.)
- B** Ø 150 mm

Counting system KERN CCS

KERN KFP

KERN CFS

**Counting the smallest parts in the largest quantities,
counting resolution $\geq 300,000$ points**

08

Features:

This highly-accurate KERN CCS counting system, consisting of a KERN KFP bulk balance and a KERN CFS reference balance, can replace a whole range of individual counting balances.

KERN KFP bulk scale

The high-accuracy quantity counting takes place on the weighing platform (= weighing bridge) KERN KFP

- Stainless steel platform, substructure steel lacquered
- Aluminium Single-Point load cell (1x3000 e), protected to IP65

KERN CFS reference balance

This KERN CFS professional counting balance which can be used as an individual balance can

also fulfil even the highest level of requirements for accuracy, weighing range and volume of items by connecting it to a high-capacity weighing bridge

- Large backlit LCD displays with digit height 20 mm
- Programmable using numerical keypad:
 - required reference quantity
 - known reference weight
- Memory (PLU) for 100 items with additional text
- Weighing with tolerance range (checkweighing)
- Fill-to-target function: Programmable target weight. An audible and visual signal will be displayed when the target value is reached
- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight

Options:

- Reference balance can also be delivered separately, for further details see pag. 73, **KERN CFS 6K0.1, € 290,-**
 - Rechargeable battery pack internal, operating time approx. 70 h, charging time approx. 14 h, **KERN GAB-A04, € 40,-**
 - Standard printer, **KERN YKB-01N, € 240,-**
 - Label printer, **KERN YKL-01, € 650,-**
- For all printers, see page 125

Technical data:

KFP: (For details see page 109)

- Weighing plate (stainless steel):
 - A 400x300x128 mm (Fig.)
 - B 500x400x137 mm
 - C 650x500x142 mm
- Connection cable approx. 1.5 m

CFS:

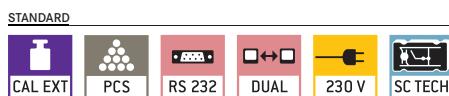

- Overall dimensions WxDxH 320x330x125 mm
- Weighing plate (stainless steel): 320x230 mm
- Net weight approx. 3.8 kg

! Other bulk scales on request, e.g.

1 Pallet scales,

2 Floor scales,

3 Drive-through scales, etc.

9 Platform scales

KERN Model	Page
EOL All-round platform scale with the best price performance ratio	84
EOB The bestseller in parcel- and veterinary scales, also with XL platform	85
DE-D Multi functional scale with IP65 display device	86/87
IFS The industrial scale for professionals	88
EOB-M Affordable parcel scale with EC-Type Approval [M]	89
IFB Robust and extremely affordable platform scale with EC-Type Approval [M]	90
DS Industrial scale with laboratory accuracy, also with EC-Type Approval [M]	91
IKT Touchscreen platform scale with enormous range of functions	92/93
ITX Modular family of scales with with IP65 and EC-Type Approval [M]	94–96

Platform scales - the all-rounder in industrial scales

In the KERN range there are portable, affordable entry level models for weighing post or parcels, high-quality models with a high IP rating and verification for trade applications, up to top level models with touch-screen technology for complex recipe or checkweighing applications with relay control - for each application we have the right platform scale.

The benefits of platform scales are clear for all to see:

- Weighing range from 3 kg - 300 kg
- Robust platform construction for the harshest industrial use
- Versatile, available with column
- High overload protection
- Stainless steel weighing plate, shock proof and easy to clean
- Display device can be positioned separately, e.g. wall-mounted, on a column or next to the platform. This guarantees that you always have a clear view of the display even with bulky items on the scale
- Large selection of platform sizes. From the small laboratory platform 228 x 228 mm (KERN DS) up to the pallet platform 1500 x 1250 mm (KERN BFS).

In order to fulfil the diverse requirements of our industrial customers, KERN platform scales have a large number of practical functions. From counting and recipe functions via data interfaces to connecting balances in a network or connecting with a PC or printer through right to useful battery operation for mobile use. The „Dynamic Weighing“ function is particularly useful for industrial weighing and guarantees stable results even when the location is unstable or when weighing animals – a true all-rounder.

Platform scales KERN EOL · EOE

KERN EOL

KERN EOE

Allround platform scales with the best price performance ratio

Features

- Simple and convenient 4-key operation
- Optional battery operation

EOL:

- Particularly flat design
- Ready for use: Block battery 9V included, operating time approx. 60 h

09

EOE:

- Wall mount for display device standard
- **1** Animal weighing program: When the animal moves during the weighing process, a stable average value is obtained by pressing the HOLD key. This value remains „frozen“ until the HOLD key is pressed again

Options

- 2 EOL:**
• Mains adapter (external) not included, can be reordered, **KERN 440-902, € 15,-**

EOE:

- Ascending ramp for models with weighing plate sizes WxD 505x505 mm, not included. WxDxH 505x507x87 mm, **KERN EOE-A02, € 100,-**
- Non-slip rubber mat, WxD 945x505 mm, **KERN EOE-A01, € 35,-**
- Sturdy transport case, for weighing plate sizes ≤ 315x305 mm, details see page 126, **KERN MPS-A07, € 95,-**

Technical data

- Large LCD display, digit height 25 mm
- Weighing plate steel lacquered
- UNITS: Further weighing units see the internet
- Optional battery operation

Platform scales KERN EOB · EOS

KERN EOB

KERN EOS

The bestseller in parcel and veterinary scales,
also with XL platform

Features

- Simple and convenient 4-key operation
- Wall mount for display device standard
- Animal weighing program: When the animal moves during the weighing process, a stable average value is obtained by pressing the HOLD key. This value remains „frozen“ until the HOLD key is pressed again
- UNITS: Further weighing units see the internet

EOS:

- The scale can be easily transported using 2 rollers and a handle and does not require much storage space

Options

EOB:

- Only Weighing plate C: Non-slip rubber mat, **KERN EOE-A01, € 35,-**
- 1 Stand to elevate display device, height of stand approx. 450 mm (for models with weighing plate sizes C), **KERN EOB-A01N, € 35,-**

EOS:

- Non-slip rubber mat standard, can be reordered, **KERN EOS-A01, € 35,-**
- 2 Stand to elevate display device, height of stand approx. 950 mm, **KERN MWS-A01, € 130,-**

Technical data

- Large LCD display, digit height 25 mm
- Dimensions of display device WxDxH 210x110x45 mm
- Cable length of display device approx. 1,8 m
- Optional battery operation, 6x 1.5V AA not included, operating time approx. 60 h
- Permissible ambient temperature 10°C / 35°C

09

Multi functional scale with IP65 display!

Features

- High mobility: thanks to battery operation (optional), compact, flat construction and low weight, it is suitable for use in several locations (production, warehouse, dispatch department,...)
- **3** Flexible positioning of display device: mounted onto the front (optional), free-standing, mounted to the wall (wall mount standard)
- Display device: IP65. Protected against dust and water splashes (only when using battery or rechargeable battery pack)
- PRE-TARE function for manual subtraction of a known container weight, useful for checking fill-levels
- With the recipe function you can weigh the different ingredients of a mixture. As a check, you can also recall the total weight of all the ingredients
- Freely programmable weighing unit (e.g. display directly in special units such as length of thread g/m, paper weight g/m², or similar)
- UNITS: Further weighing units see the internet

Platform scale KERN DE-D

Options

- 1 Second display, **KERN YKD-A01**, € 95,-
- Protective working cover over the display device, standard, can be reordered, **KERN DE-A12**, € 20,-
- Rechargeable battery pack internal, operating time approx. 15 h, charging time approx. 10 h, **KERN NDE-A02**, € 40,-
- Mount to fasten display device to the platform, **KERN DE-A11**, € 30,-
- 2 Stand to elevate display device, height of stand approx. 450 mm, **KERN DE-A10**, € 70,-

- 5 Standard printer, **KERN YKB-01N**, € 240,-
- 4 Label printer, with printout configuration and barcode function, **KERN YKL-01**, € 650,-
- 6 Statistics printer, **KERN YKT-01**, € 820,-
- 7 Statistics printer, **KERN YKS-01**, € 390,-

Platform scale KERN IFS

The industrial scale for professionals

Features

- 09
- Industrial quality: because of its stable construction and robust design, it is ideal for continuous use in industrial applications
 - Benchtop stand incl. wall mount for display device as standard
 - Precise counting: The manual optimisation of reference weight gradually improves the average value of the piece weight
 - Weighing with tolerance range (checkweighing): Input of an upper/lower limit value. A visual and audible signal assists with portion division, dispensing or grading
 - Totalizing of counting operations

Options

- 1** Stand to elevate display device, height of stand approx. 330 mm, **KERN IFB-A01, € 40,-**
- height of stand approx. 600 mm, for models with weighing plate sizes **C, D**, **KERN IFB-A02, € 50,-**
- Rechargeable battery pack internal, operating time approx. 30 h, charging time approx. 12 h, **KERN KFS-A01, € 30,-**
- 2** Standard printer, **KERN YKB-01N, € 240,-**
- Label printer, **KERN YKL-01, € 650,-**

Technical data

- Large backlit LCD displays, digit height 13/16 mm
- Dimensions of weighing plate (stainless steel):

Price reduction

Robust and extremely affordable platform scale with EC-Type Approval [M]

Features

- 09 • Industrial quality: because of its stable construction and robust design, it is ideal for continuous use in industrial applications
 • Benchtop stand incl. wall mount for display device as standard
 • Dynamic weighing: at the push of a button, a stable average weight is given when the environmental conditions are unstable or when weighing animals
 • Weighing with tolerance range (checkweighing): Input of an upper/lower limit

value. A visual and audible signal assists with portion division, dispensing or grading

- Totalizing of weights

Options

- 1 Stand to elevate display device, height of stand approx. 330 mm, **KERN IFB-A01, € 40,-**, height of stand approx. 600 mm, for models with weighing plate sizes C, D, **KERN IFB-A02, € 50,-**
- Rechargeable battery pack internal,

operating time approx. 8 h, charging time approx. 12 h, must be ordered at purchase,

KERN KFB-A01, € 30,-

Platform scale KERN DS

**Industrial scale with laboratory accuracy,
also with EC-Type Approval [M]**

Features

- User guidance step by step through Yes/No dialogue on the display
- Numerical subtraction of tare weight for known container weight. Useful for checking fill-levels
- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight

- Particularly wide range of applications: triple range scales KERN DS-TM. For more information, see also page 44.

Options

- Protective working cover over display device, standard, can be reordered, **KERN DE-A12, € 20,-**

Technical data

- Backlit LCD display, digit height 18 mm
- Dimensions of weighing plate (stainless steel):
 - A 228x228x70 mm
 - B 318x308x75 mm, see larger picture
 - C 450x350x115 mm
- Dimensions of display device WxDxH 225x115x60 mm

09

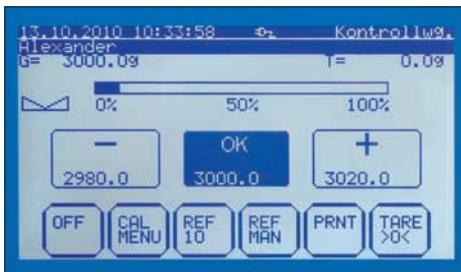

Touchscreen platform scale with enormous range of functions

Easy input of text and values using large keypad

Clear menu structure with the keys labelled with plain text

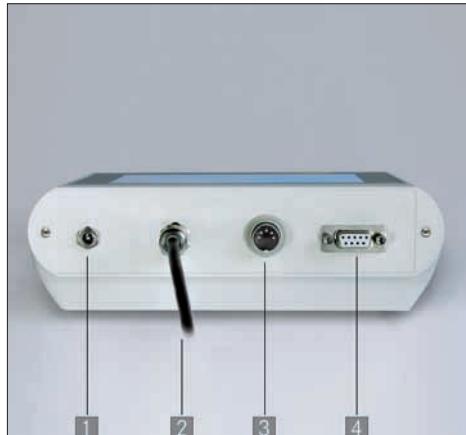

Weighing with tolerance range (checkweighing): a visual and audible signal helps with portion division, dispensing or grading

40 memories for each mode, for checkweighing, pre-tare, reference weight, target weight when dispensing, etc.

Platform scale KERN IKT

Features

- Maximum transparency: All function keys are labelled with plain text which ensures that they are easily understood. The menu tree overlay in the info bar allows you to see at a glance which function is currently in use
- Intuitive menu structure which allows you to use the balance to the fullest of its functions, without wasting time. This speeds up the workflow and therefore saves time and money
- Cable connections on the rear of the display device from left to right:
 - 1** mains connection
 - 2** connection cable to platform
 - 3** Digital I/O interface (35 V / 80 mA)
 - 4** Data interface RS 232
- Convenient recipe weighing: 5 recipes each with 7 components can be stored in plain text

Options

- Rechargeable battery pack external, operating time approx. 10 h, charging time approx. 10 h, **KERN KS-A01, € 170,-**
- Set for suspended weighing, consists of platform, bow, hook, only for models with weighing plate **B**,
- **5** Standard printer, **KERN YKB-01N, € 240,-**
- **6** Label printer, **KERN YKL-01, € 650,-**
- **7** Statistics printer, **KERN YKT-01, € 820,-**
- **8** Statistics printer, **KERN YKS-01, € 390,-**

Technical data

- Backlit LCD graphic display with digit height 18 mm, screen diagonal 5.8"
- Dimensions of weighing plate (stainless steel):
 - A** 228x228x70 mm
 - B** 315x305x75 mm
 - C** 450x350x115 mm
- Dimensions of display device WxDxH 200x155x68 mm
- Cable length of display device for weighing plate size
 - A, C** approx. 1 m
 - B** approx. 1,5 m
- Permissible ambient temperature 10°C / 40°C

Modes

- Weighing
- Counting
- Dispensing
- Recipe weighing
- Checkweighing
- Totalizing with daily total
- Percentage determination
- Animal weighing
- Surface weight

Functions

- Capacity display
- Automatic taring
- Dispensing assistance (subtractive, additive)
- Net/Gross display, permanently on
- Variable reference quantity
- Automatic reference optimisation
- Tare deduction numerical or from the memory unit
- Input of item or batch description, operator etc.
- Freely programmable weighing unit (e.g. display directly in special units such as length of thread g/m, paper weight g/m², or similar)
- Date/time
- Statistical function
- GLP printout
- Individual printout configuration

Platform scale KERN ITB

Quality platform scale with protection against dust and water splashes to IP65

Features

- Robust metal housing
- Steel substructure powder coated
- Automatic taring when placing a container, saves time
- Dosage aid controlled through the display

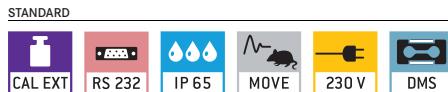

Options

- Protective working cover over the display device, standard, can be reordered, **KERN ITB-A03, € 20,-**
- Wall mount for display device, tiltable, **KERN ITB-A01, € 95,-**
- Mount to fasten the display device to the platform, **KERN ITB-A02, € 80,-**

Technical data

- Backlit LCD display, digit height 16 mm
- Dimensions of weighing plate (stainless steel):
 - A** 300x240x78 mm, **B** 400x300x83 mm,
 - C** 500x400x83 mm, **D** 650x500x110 mm,
 - E** 800x600x120 mm
- Dimensions of display device WxDxH 260x195x75 mm
- Permissible ambient temperature -10°C / 40°C

Quality platform scale for demanding weighing and counting applications, with protection against dust and water splashes to IP65

Features

Functions as with ITB, in addition however with:

- Capacity display: A bar lights up to show how much of the weighing range is still available
- Net/Gross weight: to control the consumed weighing range at the touch of a key
- Piece counting with fixed reference quantities (1, 2, 5, 15, 20, 25, 30, 50, 100 pieces)
- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- High-resolution display (only for verified models): Readout [d] for 10 sec increased by one decimal place

Options

- only for non-verified models: Interface for second balance, must be ordered at purchase, **KERN KMS-A01, € 550,-**
- Further options, see page 94

Technical data

- Backlit LCD display, digit height 16 mm
- Dimensions of weighing plate (stainless steel):
 - A** 300x240x78 mm, **B** 400x300x83 mm
 - C** 500x400x83 mm
 - D** 650x500x110 mm
 - E** 800x600x120 mm
- Dimensions of display device WxDxH 260x195x75 mm
- Permissible ambient temperature -10°C / 40°C

Platform scale KERN ITT

Quality platform scale with wide range of functions and numerous memories, with protection against dust and water splashes to IP65

Features

Functions as with ITS, in addition however with:

- Capacity display: A bar lights up to show how much of the weighing range is still available
- Net/Gross weight: to control the consumed weighing range at the touch of a key
- Piece counting with fixed reference quantities
- Precise counting: The automatic optimisation of reference weight gradually improves the average value of the piece weight
- High-resolution display (only for verified models): Readout [d] for 10 sec increased by one decimal place
- 40 tare memory units
- 40 reference memory units
- 20 memory units for weighing with tolerance ranges (Input in weight, pieces, %)
- Tare deduction numerical or from the memory unit
- Piece counting with variable reference, numerical or from the memory unit

10 Floor, pallet and drive-through scales

KERN Model		Page
BOBP	Floor scale with the best price performance ratio	98
BFS	Robust floor scale with piece-counting function	99
BFB	Robust and extremely affordable floor scale with EC-Type Approval [M]	100
BTxP	Quality floor scale for high demands, with EC-Type Approval [M]	101
UOB	The bargain in pallet scales	102
UFB	Robust pallet scale in two versions,	
UFN	suitable with EC-Type Approval [M]	103
UTEP	Mobile for any situation and for heavy loads,	
UTNN	with EC-Type Approval [M]	104
NTEP	Extremely flat drive-through scale where driving on	
NTNN	is no obstacle, with EC-Type Approval [M]	105

Robust assistant when weighing large loads

KERN offers a carefully coordinated range of affordable entry level models, through to practical built-in solutions up to the top level verified models made of stainless steel. The common factor is the long-lasting industrial quality as well as the high level of protection against dust and water splashes.

The setup, startup, and possible calibration of floor, pallet, and drive-through scales require specialized knowledge, which is the basis for a successful sale. Please ask for our „Floor scale info sheet“.

Floor scale KERN BOBP

Floor scale with the best price performance ratio

Features

- Simple and convenient 4-key operation
- Weighing bridge with non-slip steel chequer plate, lacquered. Overall height of weighing bridge 90 mm, height-adjustable screw feet to level the platform
- Wall mount for display device
- Animal weighing program: When the animal moves during the weighing process, a stable average value is obtained by pressing the HOLD key. This value remains „frozen“ until the HOLD key is pressed again

- Optional battery operation, 6x 1.5V AA not included. AUTO-OFF function to preserve the battery. Operating time approx. 60 h
- UNITS: Further weighing units see the internet

Options

- 1 Stand to elevate display device, height of stand approx. 950 mm,
KERN MWS-A01, € 130,-
- Ascending ramp including fixing board between weighing bridge and ascending ramp, WxDxH 996x507x87 mm, not included,
KERN BOBP-A01, € 130,-

Technical data

- Large LCD display, digit height 25 mm
- Dimensions of weighing plate WxDxH 1006x996x90 mm
- Dimensions of display device WxDxH 210x110x45 mm
- Cable length of display device approx. 6 m
- Net weight approx. 50,5 kg
- Permissible ambient temperature 10°C / 35°C

Floor scale KERN BFS

Robust floor scale with piece-counting function

Features

- Weighing bridge with non-slip steel chequer plate, lacquered. Overall height 80 mm
- Easy access to the junction box from the top
- Comfortable adjustment of the weighing bridge from above
- Benchtop stand incl. wall mount for display device as standard
- Precise counting: The manual optimisation of reference weight gradually improves the average value of the piece weight
- Totalizing of counting operations
- Weighing with tolerance range (checkweighing): Input of an upper/lower limit value. A visual and audible signal assists with portion division, dispensing or grading

Options

- 1** Stand to elevate display device, height of stand approx. 750 mm, similar to illustration, **KERN BFS-A07, € 100,-**
- Ascending ramp, not included, for models with weighing plate sizes
A WxD 1000x840 mm,

Floor scales KERN BTEP · BTBP · BTSP · BTTP

Quality models for high demands,
with EC-Type Approval [M]

Features

- Weighing bridge with non-slip steel chequer plate, lacquered (IP65: Protected against dust and water splashes), extremely resistant to bending. Overall height 80 mm
- Four load cells (IP68) versatile supported, therefore especially shock absorbent, even against transverse forces
- Easy adjustment, special corner adjustment with built-in junction box (stainless steel, IP65: Protected against dust and water splashes, 5 connections)
- 1** BTEP: Weighing, counting, checkweighing
- 2** BTBP: Weighing
- 3** BTSP: Weighing, counting
- 4** BTTP: Weighing, counting, recipe weighing, memory, numerical inputs, checkweighing

Options

- Wall mount for display device for BTBP, BTSP, BTTP: **KERN ITB-A01, € 95,-**, for BTEP: **KERN KME-A01, € 90,-**
- Stand to elevate display device, for KERN BTBP, BTSP, BTTP, height of stand approx. 1140 mm, **KERN ITB-A08, € 220,-**, for BTEP, height of stand approx. 1100 mm, **KERN UTNN-A01, € 130,-**
- Ascending ramp not included, for models with weighing plate sizes
 - A** 1000x750 mm, **KERN BTEP-A01, € 370,-**
 - B** 1500x750 mm, **KERN BTEP-A02, € 470,-**
- Stand base plate, 480x480 mm, for BTBP, BTSP, BTTP, **KERN TS-A28, € 130,-**
- Pair of base plates to fix the weighing bridge to the floor, not included, **KERN TS-A30, € 70,-**

- Label printer with printout configuration and barcode function, **KERN YKL-01, € 650,-**
- Cable with special length 10 m, must be ordered at purchase, **KERN TS-A31, € 120,-**
- Further accessory see internet

Technical data

Dimensions of weighing plate

- A** 1000x1000 mm
- B** 1500x1250 mm
- C** 1500x1500 mm

for models with weighing plate sizes

- A** approx. 99 kg
- B** approx. 171 kg
- C** approx. 204 kg

Cable length of display device approx. 5 m

Permissible ambient temperature -10°C / 40°C

Dispatch complete on pallet. Please ask for dimensions, gross weight, shipping costs

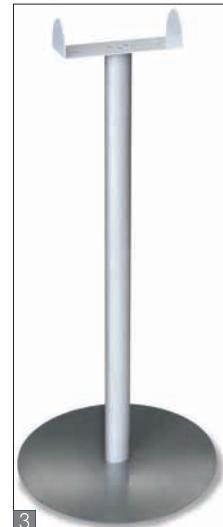

Note: For verified models the weighing bridge must be fixed to the floor. Optionally by two ascending ramps or two pairs of base plates or by a combination of these two options.

Pallet scale KERN UOB

The bargain in pallet scales

Features

- High mobility: Battery operation, compact, flat construction and low weight make this balance ideal for use in several locations (production, warehouse, dispatch department, ...)
- **1** 2 rollers and handle for easy transport of the scale, height-adjustable screw feet to level the platform
- Weighing bridge lacquered steel
- Simple and convenient 4-key operation
- Wall mount for display device
- The Hold key enables you to obtain a stable weight if weighing conditions are unstable. This value remains „frozen“ until the Hold key is pressed again
- Optional battery operation, 6x 1.5V AA not included. AUTO-OFF function to preserve the battery
- UNITS: Further weighing units see the internet

Options

- **3** Stand to elevate display device, height of stand approx. 950 mm, **KERN MWS-A01**, € 130,-

Technical data

- Display device with large LCD display, digit height 25 mm
- Dimensions of display device WxDxH 210x110x45 mm

Pallet scales KERN UFB · UFN

KERN UFB

KERN UFN

**Robust pallet scale in two versions,
suitable with EC-Type Approval [M]**

Features

- High mobility: thanks to battery operation and compact, flat construction, it is suitable for use in several locations (production, warehouse, dispatch department,...)
- Sturdy handle for easy transportation of the scale
- Dynamic weighing: at the push of a button, a stable average weight is given when the environmental conditions are unstable or when weighing animals
- Weighing with tolerance range (check-weighing): Input of an upper/lower limit value. A visual and audible signal assists with portion division, dispensing or grading
- Totalizing of weights
- Load cell steel, silicone-coated, IP67
- Load support solid steel construction, extremely resistant to bending

UFB:

Note: For applications that require verification, please order verification at the same time, initial verification at a later date is not possible.
For the verification at the factory, we need to know the full address of the location of use.

11 Display devices / Weighing bridges

Individuality is the trump card

Do you have any special requests, which are not covered by our extensive balance range? Then why not configure your ideal model yourself, it's quick, individual and affordable.

It's your choice:

- Choose one of the many KERN weighing bridges, pallet scales or drive-through scales and combine these with one of the many KERN display devices
- Combine **your** weighing bridge with a KERN display device
- Combine **your** display device with a KERN weighing bridge

With KERN get your ideal balance verified too

To help you achieve a verified individual scale combination KERN offers you full support, such as for example

- Production of proof of compatibility
- Support in preparing for verification
- Issue of declaration of conformity and much more

Of course we can also offer you the complete service and put the required scale combination together for you, including verification. All further details can be found on the following pages or ask your personal customer service agent, he will be pleased to advise you.

KERN Components

You select the KERN-components,
KERN will look after the rest:

- 1 Platforms KERN KTP, KFP (see page 109)
- 2 Display devices KF...-T (see page 108)
- 3 Assembly of a complete scale
- 4 Verification at the factory
- 5 Proof of compatibility for on-site verification
- 6 DKD calibration

Verification consultation service for individual scale combinations

Information for specialist balance companies:

If display devices (terminals) with EC-Type approval and weighing bridges (e.g. platforms, floor scales or drive-through scales) with EC-Type approval are combined as a complete unit, then this weighing system can be verified as a class III commercial scale.

For this procedure KERN offers the following support:

- 4 **Proof of compatibility:** We will confirm whether combinations of weighing modules such as display devices, load cells and connecting elements are appropriate for verification. We would be pleased to carry this out for you.
- **Eligibility for initial verification by the manufacturer:** We will support you in preparing for verification and issue of the declaration of conformity.

Platform KERN KFP V20

- 1 load cell, aluminium, silicone-coated, IP65
- Stainless steel weighing plate. Painted steel base
- Foot screws and level indicator
- OIML-approved load cell, class III, 3000 e

Platform KERN KTP V40

- 1 load cell, stainless steel, hermetically encapsulated, IP68
- Stainless steel weighing plate and base
- Foot screws and level indicator
- OIML-approved load cell, class III, 3000 e

U-shaped weighing bridge KERN KFU

- 4 load cells, steel, silicone-coated, IP67
- Load area, painted steel (_V20), stainless steel (_V30)
- 2 rollers and handle for easy transport of the scale
- OIML-approved load cell, class III, 3000 e

Weighing bridge KERN KFP V20

- 4 load cells, steel, silicone-coated, IP67
- Painted steel base. Weighing bridge plate, out of anti-slip corrugated steel, painted.
- Extremely resistant to bending because of its high material thickness.
- Can be built in using pit frames (optional)
- OIML-approved load cell, class III, 3000 e
- For accessories see page 99/100, KERN BFS/BFB

VHM	Professional pallet truck scale with removable battery pack and EC-Type Approval [M]	115

Weighing and transportation in one operation

Speed up your warehouse and dispatch processes with the KERN pallet truck scales.

Get the exact weight of a load and at the same time, transport it to a specific location, all in one operation. This shortens commissioning times and also avoids the queues, which can occur when you use fixed floor scales.

These mobile weighing solutions are space-saving and deliver reliable weighing results in any location. So, for example in Goods Inwards and Outwards, you can quickly identify differences between given and actual weights. This uncovers any errors in quantities, saves you time and money and thus ensures a very short amortisation period for the original cost of the scale.

KERN offers a carefully coordinated range from affordable entry level models, via the easy-to-use model with counting function, printer or removable battery pack for uninterrupted functionality, right through to the top level model in verified version.

KERN pallet truck scales are made in robust industrial quality, with high level of protection against dust and water splashes, with high-contrast, easy-to-read displays as well as solid wheels and load rollers with foot brakes - all this helps to give you practical support in your work - day after day.

Of course, all KERN pallet truck scales can also be calibrated and delivered with a DKD calibration certificate (optional). This ensures the high level of accuracy of your pallet truck scale.

Pallet truck scale KERN VHE

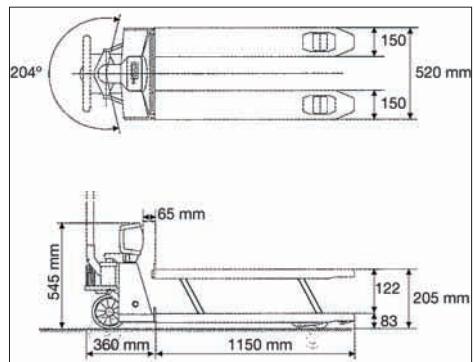

This model is the ideal entry into the world of mobile weighing

Features

- Very manoeuvrable thanks to its compact construction and low weight
- Particularly robust because the sensitive components have been relocated from the load fork into the protected housing area. It is therefore also ideal for heavy applications in the production area and on board lorries
- Low height of the loading forks making it easy to work with low pallets
- **A** Display device: IP65. Protected against dust and water splashes
- **B** Load area: IP67. Load cells are protected against dust and water, designed for temporary use in wet areas
- Pivot range 204°, solid rubber castors on aluminium rims
- Specially constructed for general check-weighing, e.g.: Plausibility check at Goods Inwards, establishing shipping weights, avoiding overloads, safety checks
- Operation:
 - 1 Pump up the load fork to the reference height
 - 2 Switch on and then tare off
 - 3 Release the load fork and position the goods to be weighed on it
 - 4 Weighing: Pump the load fork up to the reference height
- **C** Transport position
- **D** Weighing position
- Ready for use: Batteries included (4x 1,5V AA). AUTO-OFF function to preserve the battery. Operating time approx. 1 year/3000 weighings. Charge condition indicator on display

Technical data

- Display device with large LCD display with digit height 18 mm

Transportation and weighing in one operation

Features

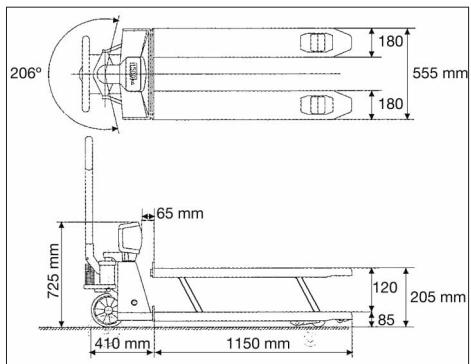

- PRE-TARE function for manual subtraction of a known container weight, which can be saved
- **1** Display device: IP65. Protected against dust and water splashes
- **2** Load area: IP67. Load cells are protected against dust and water, designed for temporary use in wet areas
- Pivot range 206°, solid rubber castors on aluminium rims
- **3** Tandem tyres on load rollers so that you can get over thresholds and obstacles more easily
- Ready for use: Batteries included (4x 1,5V AA). AUTO-OFF function to preserve the battery. Operating time approx. 80 h/1700 weighings. Charge condition indicator on display

Options

- **4** Footbrake to lock solid rubber castors, **KERN VHB-A01, € 260,-**

Hanging scales KERN HDB · CH

KERN HDB

KERN CH

Convenient and always handy

Features

• Multi data hold function:

By pressing the Hold key...

- the weight display can be „frozen“ for 5 sec
- the weight display can be „frozen“ until any key is pressed

When the weighing value remains unchanged...

- the weight display is automatically „frozen“ for 5 sec
- the weight display is automatically „frozen“ until any key is pressed

HDB:

- Hook (stainless steel), can be hinged
- Ready for use: 2x 1.5V AAA standard.
- AUTO-OFF function to preserve the battery.
- Operating time approx. 180 h
- Further weighing units: kg, lb, N

CH:

- Hook (stainless steel)
- Tape measure, extractable, length approx. 100 cm
- Peak load display (peak hold), measuring frequency 5 Hz
- Ready for use: 9V Block standard.
- AUTO-OFF function to preserve the battery, can be switched off
- Further weighing units: kg, lb, N
- Permissible ambient temperature 5°C / 35°C

■ Price reduction

The professional alternative up to 600 kg with rear-facing second display

Features

- With the TÜV/GS certification mark, the scale meets the requirements of the German Equipment and Product Safety Act (Geräte- und Produktsicherheitsgesetz, GPSG) and has been tested in accordance with EN 13155 (Non-fixed load lifting attachments) and EN 61010-1 (Elektrische Sicherheit)
- High mobility: thanks to battery operation, compact construction and low weight, it is suitable for use in several locations (production, warehouse, dispatch department,...)
- Second display on the rear of the balance
- Hook with safety catch, revolving

• Rechargeable battery pack internal, standard, operating time approx. 30 h, charging time approx. 14 h with mains adapter. Charge indicator using LED

• Data hold function: When the weighing value remains unchanged the weight indicated on the display is automatically „frozen“ until the HOLD key is pressed

• Tare: Resets the display to „0“ when there is a load on the scale. Now removed or added loads are directly displayed

• Radio remote control standard. Range approx. 20 m. All functions can be selected (excl. ON/OFF). WxDxH 48x10x95 mm.

Batteries included 2 x 1,5 V AAA

Technical data

- Superior display size: digit height 25 mm. Bright backlight for easy reading of weight, even from a distance
- Dimensions housing WxDxH 163x126x158,5 mm
- Precision: 0.2 % from [Max]
- Permissible ambient temperature 0°C / 40°C

Crane scale KERN HUS

Compact up to 600 kg

Features

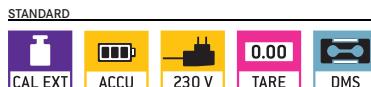

- With the TÜV/GS certification mark, the scale meets the requirements of the German Equipment and Product Safety Act (Geräte- und Produktsicherheitsgesetz, GPSG) and has been tested in accordance with EN 13155 (Non-fixed load lifting attachments) and EN 61010-1 (Elektrische Sicherheit)
- Hook with safety catch, forged steel, nickel-plated, revolving
- Loop forged steel, nickel-plated
- Rechargeable battery pack internal, standard, operating time approx. 120 h,

charging time approx. 8 h (internal charging with mains adapter). Selectable: AUTO-OFF function or permanent operation. Charge condition indicator using three-colour LED

- Data hold function: When the weighing value remains unchanged the weight indicated on the display is automatically „frozen“ until the HOLD key is pressed
- Tare: Resets the display to „0“ when there is a load on the scale. Now removed or added loads are directly displayed
- Infrared remote control standard. Range approx. 2.5 m. All functions can be selected. WxDxH 120x60x15 mm. Batteries included, 2 x 1,5 V AAA

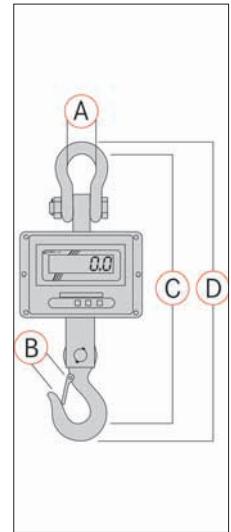

Technical data

- Backlit LCD display, digit height 23 mm
- Dimensions housing WxDxH 150x145x160 mm
- Total height from loop to hook 380 mm (KERN HUS 600K200: 400 mm)
- Precision: 0.2 % from [Max]
- Net weight approx. 4 kg

Crane scale KERN HFM

High resolution industrial crane scale up to 10 t

Features

- With the TÜV/GS certification mark, the scale meets the requirements of the German Equipment and Product Safety Act (Geräte- und Produktsicherheitsgesetz, GPSG) and has been tested in accordance with EN 13155 (Non-fixed load lifting attachments) and EN 61010-1 (Elektrische Sicherheit).
- Professional device for robust applications in production, quality control, logistics, etc. Because of its stable construction and robust design, it is ideal for continuous use in industrial applications
- High mobility: thanks to battery operation, compact construction and low weight, it is suitable for use in several locations (production, warehouse, dispatch department,...)
- Hook with safety catch, revolving
- Rechargeable battery pack internal, standard, operating time approx. 100 h, charging time approx. 14 h with mains adapter. Charge indicator using LED
- Adaptation to unstable environmental conditions by changing the readout
- Data hold function: When the weighing value remains unchanged the weight indicated on the display is automatically „frozen“ until the HOLD key is pressed
- Tare: Resets the display to „0“ when there is a load on the scale. Now removed or added loads are directly displayed
- Radio remote control standard. Range approx. 20 m. All functions can be selected (excl. ON/OFF). WxDxH 48x10x95 mm. Batteries included, 2 x 1,5 V AAA

Technical data

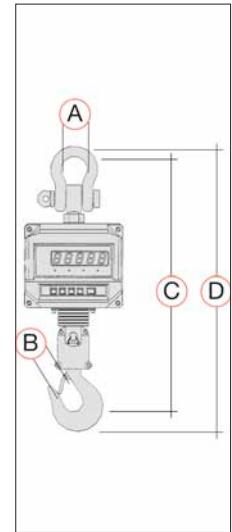

- Superior display size: digit height 30 mm. Luminescent LED display for easy reading of the weight, even from a distance
- Precision: 0.2 % from [Max]

Crane scale KERN HTS

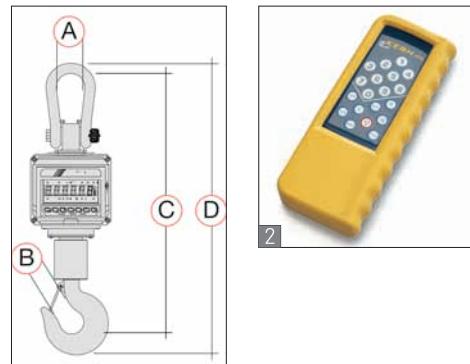

Industrial crane scale up to 10 t, IP65,
with EC-Type Approval [M]

Features

- **2** Infrared remote control standard. Range approx. 15 m. All functions can be selected (excl. ON). Input via numeric key pad. Incl. protective case. WxDxH 200x80x28 mm. Batteries included, 2 x 1,5 V AAA
- Hook chromed, with safety catch, revolving

- Robust metal housing
- Standby function: automatic switch off of the display after 5 min without a change of load. Automatic activation with the touch of a key
- Display Gross/Tare/Net by means of LEDs
- Further functions: 10 tare or unassigned memory units, e.g. for weight increments or identification numbers, Weighing sum memory (adds individual weighing results), Peak load display (peak hold)

- Data hold function: the weight display is „frozen“ by double-pressing a key, until the „C“ key is pressed
- Charge condition indicator using three-colour LED

Options

- Rechargeable battery pack internal, standard, operating time approx. 150 h, charging time approx. 15 h. For models with Max ≤ 1.500 kg internal with mains adapter. Can be reordered, **KERN HTS-A01, € 90,-**
- For models with Max ≤ 3.000 kg external through battery charger.. Can be reordered, **KERN HTS-A02, € 165,-**

Individual header data If noted on the balance, for printers KERN 911-013, YKB, YKL the free software KERN SHM-01 (see www.kern-sohn.com) can be used to print 4 header lines on the printout. Compatible models:
KERN 440, BTBP, BTSP, BTTP, CME, CDE, DE, FCB, FTB, FTC, FKB-A, ITB, ITS, ITT, KMB-TM, KMS-TM, KMT-TM, NDE, PCB.

KERN 911-013

Matrix needle printer

for KERN balances with data interface RS 232C for transmission of weighing data. Printout suitable for a longterm storage.

Technical data:

- Paper stripes: 57 mm wide
- Dimensions: WxDxH 105x180x90 mm
- Operation by mains adapter 230V/50Hz (standard)

Please state balance model so the printer can be preconfigured.

Price without interface cable,
KERN 911-013, € 330,-

Accessories:

Paper rolls (10 pcs.),
KERN 911-013-010, € 35,-

KERN YKB-01N

Standard printer

for KERN balances with RS 232 data interface. Printout of date and time. Conform to GLP.

Technical data:

- Heattransfer printing
- Speed: 0,75 lines/sec
and max. 40 characters per line

- Paper stripes: 112 mm wide

- Dimensions: WxDxH 165x140x50 mm
- Operation by mains adapter 230V/50Hz (standard)

Please state balance model so the printer can be preconfigured.

Price without interface cable,
KERN YKB-01N, € 240,-

Accessories:

Paper rolls (10 pcs.),
YKB-A10, € 35,-

KERN YKL-01

Label printer

for self-adhesive labels on a roll, for KERN scales, see table for interface cables, column "YKL-01 weighing data print". For models with an interface cable article number in column "YKL-01 barcode print", printout configuration is also available as a factory option 1:

- 4 header lines for address and company logo
- Gross/Tare/Net weight
- Parts counting
- Barcode

For details on the printout configuration, please refer to www.kern-sohn.com,
KERN YKL-A03, € 150,-

Please state balance model so the printer can be preconfigured.

Price without interface cable,
KERN YKL-01, € 650,-

Accessories:

Paper rolls with label size:
WxH 57x51 mm, 1370 pcs.,
KERN YKL-A02, € 50,-
WxH 57x102 mm, 700 pcs.,

KERN YKS-01

Statistics printer

for balances with RS 232 C data interface (see table on page 126). Quiet thermal printer with 0.75 lines/sec and max. 40 characters per line. GLP record keeping of balance adjustment with date and time print. Numerator; with statistical functions such as count and total of all measurements, minimum and maximum values of the main unit,

range (Max-Min), average value, standard deviations. Available units: mg, g, kg, pcs. Language versions: D, GB, F, PL

Technical data:

- Paper stripes: 112 mm wide
- Dimensions: BxTxH 165x140x50 mm
- Operation by mains adapter 230V/50Hz (standard)

Please state balance model so the printer can be preconfigured.

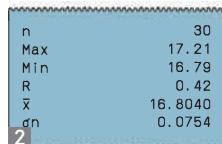

Price without interface cable,
KERN YKS-01, € 390,-

Accessories:

Paper rolls (10 pcs.),
KERN YKB-A10, € 35,-

KERN YKT-01

Statistics printer

for KERN balances with data interface RS 232 C (see table p. 126, column YKT). Quiet and fast standard printer with 5 lines/sec and max. 24 characters per line. Double-spaced display for straightforward dialogue mode. Automatic measured value enquiry, time interval of 1 sec up to 99 h. Measured value memory with max. 999 measured values. Selectable units: mg, g, kg, t, ct, lb. GLP record keeping of the balance adjustment. Display of date

and time. Language versions D, GB, F. With statistical functions 2 such as standard deviation, variance as well as characteristic values such as range "R", totalizing, upper/lower limits (OGW/UGW), process potential (Cp), process capability (Cpk).

Technical data:

- Paper stripes: 58 mm wide
- Dimensions: BxTxH 116x215x85 mm
- Operation by mains adapter 230V/50Hz (standard)

Please state balance model so the printer can be preconfigured.

Price without interface cable,
KERN YKS-A01, € 820,-

Accessories:

Paper rolls (10 pcs.),
KERN YKT-01, € 35,-

Universal carrying case for scales

adjustable to user specification thanks to pre-perforated foam material. Interior measurements WxDxH 520x320x95 mm. Only for scales with strain gauge weighing systems, not suitable as delivery packaging,

KERN YPS-02, € 145,-

Sturdy transport case

for the safe transport and storage of series EOE, EOB scales with weighing plate size $\leq 315 \times 305$ mm without stand; inner dimensions WxDxH 425x315x65 mm,
KERN MPS-A07, € 95,-

Second display

Ideal for training or for demonstration purposes in laboratories or in industry

- Large backlit LCD display digit height 25 mm
- Two additional RS 232 data interfaces
- Interface cable to the scale, length approx. 1.5 m
- Mains adapter, standard
- Dimensions WxDxH 200x100x55 mm

Suitable for models 440, CB, CDE, CME, DE, FCB, FKB...A, NDE, PCB, **KERN YKD-A01, € 95,-**

Board for suspended weighing

made of aluminium, with adjustable lower plate, 4 foot screws, WxDxH 350x290x370 mm,

KERN 904-101, € 310,-

Ethernet option ... the easy LAN connection

Allows you to connect the scale to an Ethernet network. The IP address, subnet mask and gateway are assigned to the scale manually. DHCP server are not supported.

IMPORTANT: To connect to your network, you need information and support from your network administrator. Discuss the integration of the scale with your network administrator prior to placing your order.

For models ITB/ITS/ITT:

KMB-A01, € 550,-

For models FTB/FTC:

FTB-A09, € 410,-

INTERESTING FACTS ABOUT THE DETERMINATION OF DENSITY

Density determination of liquids and solid matter, in accordance with the buoyancy method, is known for a high degree of accuracy.

Density determination of liquids: by means of measuring the buoyancy with a glass plummet, 10 cm³, resolution 0.0001 g/cm³

Density determination of solid matter: the density is the ratio of weight [g]: Volume [cm³]. The weight is derived by weighing the sample in air.

The volume is determined from the buoyancy [g] of a sample, which is submerged in a liquid. The density [g/cm³] of this liquid is known.

Applications:

- Materials analysis
- Density of porous materials
- Pre-packaged goods check, whenever the merchandise is sold according to volume [cm³]. This volume is calculated from the weight [g]: density [g/cm³].

Interface cable for RS 232, length approx. 1,5 m

Note: The interface cable is free of charge if you purchase the balance and printer together.

15 Test weights

Weights yesterday and today

Weights have always been used to carry out weighing procedures. This original purpose has almost disappeared. Today, weights are used almost exclusively for adjusting and testing = calibration of electronic balances. We therefore call them "Test weights" as this is their purpose of use.

Adjustment or calibration?

Adjusting a balance means that you are intervening in the weighing system, to make sure that the display is set to show the correct nominal value. With calibration, on the other hand, there is no intervention, you are testing whether the display is correct and documenting any deviation. For further information, see the glossary on page 151.

Testing, doing it right!

The internationally valid OIML Directive R111-2004 classifies test weights hierarchically into accuracy classes, where E1 is the most accurate and M3 is the least accurate weight class. With KERN you get the whole test weight range in all OIML accuracy classes E1, E2, F1, F2, M1, M2, M3.

As the appropriate test weight is only classed as checking equipment to ISO 9000ff if it has the relevant proof of accuracy, all KERN test weights come with an appropriate DKD calibration certificate (optional). For further details, see the DKD calibration service section on page 147.

KERN offers you the appropriate test weight package for your balance, consisting of the test weight, box and DKD calibration certificate, as proof of its accuracy ... the best pre-requisite for proper balance calibration.

Information about your KERN test weights

Selection of the appropriate test weight for your balance:

Correctly selected test weights with DKD calibration certificate are the pre-requisite for ensuring that your balances are not only correctly adjusted, but also correctly calibrated. Scheduled testing of your balances with such test weights helps to guarantee your quality requirements and to maintain your quality targets.

Here's how you find the right test weight for your balance:

A balance can never be more accurate than the test weight used to adjust it, it depends on its tolerance.

Accuracy of the test weight: Should correspond to the readout d of the balance, rather than something better.

Nominal weight value: This is shown in adjust mode „CAL“ in the balance display. Given the choice, the heaviest weight is the most suitable for accurate measurement.

Once accuracy and nominal weight value are specified, the suitable test weight is selected according to the tolerances “Tol“ of the individual accuracy classes E2-M3, see column “Tol \pm mg“ at the respective weight and table at page 129.

Example:

Balance with weighing range Max 2000 g = 2 kg and readout $d = 0,01$ g = 10 mg

- The accuracy of the required test weight is determined by readout d with approx. ± 10 mg.
- displayed weight size on „CAL“ mode: 1000 g or 2000 g. The required test weight has a 2 kg weight size.
- suitable test weights with ± 10 mg tolerance and 2 kg weight size, stand in accuracy class F1. KERN-No 327-72, see page 134.

Exception, analytical balances (readout $d \leq 0,1$ mg):

E1 test weights are recommended. Depending on the safety requirements, E2 test weights with a DKD calibration certificate will also be sufficient.

OIML Directive R111-2004 for weights

The key points from the OIML Directive R111-2004

OIML (Organisation Internationale de Metrologie Legale) has established the exact metrological requirements for weights in verified applications in approx. 100 states all over the world. The OIML recommendation R111 (2004 Edition) for weights relates to sizes 1 mg–50 kg. Statements are made on the accuracy, materials, geometric shape, marking and storage of the weights.

Error limits for weights of classes E1 to M3

The error limit classes are in fixed hierarchical levels in the proportion of 1:3, where E1 is the most accurate and M3 is the least accurate weight class. When testing weights with other weights, the correct test class is the next highest class.

Error limit classes (= tolerances)

The values given in the table below (tolerances $\pm \dots$ mg) are the respective permitted fabrication tolerances. They are to be equal to the measuring uncertainty of the weight, if no DKD calibration certificate is available.

Conventional mass

The problem is the air buoyancy, which makes the weight appear lighter. In order to avoid this "distortion" in daily use, all weights are adjusted to the unit specifications as given in R111, i.e. it is accepted that: material density of the weights is 8000 kg/m^3 , air density is 1.2 kg/m^3 and measuring temperature is 20°C .

Nominal value ↓	OIML R111-2004 Maximum permissible errors for weights = permissible tolerances „Tol \pm mg“

It contains only the weights which you need for testing purposes. KERN will make your own personal box out of plastic, wood or aluminium. For more details on this, please see page 146.

Newton weights

All slotted and hook weights are available with N adjustment according to M1 tolerances. Additional price € 8,-.

We need to know the location of use and post code. DKD-calibration certificate for N weights: identical to DKD prices for individual weights M1, additional price € 8,-.

Made specially for you

Cases/boxes for individual weight sets

Individual weight sets:

You can make up your own "tailor-made" individual weight sets yourself.

KERN will make your own personal wooden box / plastic carrying case. The largest individual weight which will fit is given in the table.

Plastic case
for weight classes **E1, E2 and F1**

KERN	For weights	€
313-050-400	≤ 500 g	82,-
313-080-400	≤ 5 kg	180,-

Sample order: Your individual weight set:

1 x 50 g, 2 x 100 g, 1 x 500 g, 2 x 1 kg, 1 x 2 kg.

The correct individual box is

KERN No. 313-080-400 (plastic) or

KERN No. 315-070-100 (wood).

Plastic case
for weight classes **F2, M1, M2 and M3**

KERN	For weights	€
333-050-400	≤ 500 g	57,-
333-080-400	≤ 5 kg	155,-

Wooden box
for weight classes **F2, M1, M2 and M3**

KERN	For weights	€
335-040-200	≤ 200 g	48,-
335-050-200	≤ 500 g	61,-
335-060-200	≤ 1 kg	108,-
335-070-200	≤ 2 kg	134,-

335-090-200	≤ 10 kg	300,-

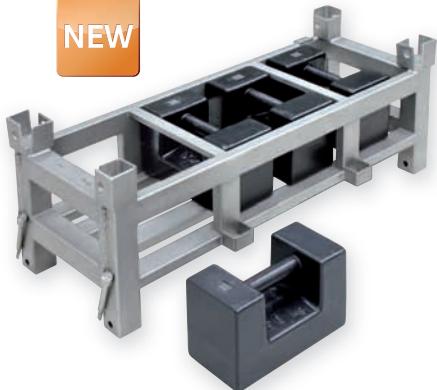

Aluminium case

for safe storage and transportation under harsh industrial conditions.
Ideal for test weights of accuracy classes E2-M3. Please ask for details.

Weight carriers for rectangular weights or other test weights

NEW

Individual weight carriers for testing high capacity floor scales, pallet scales, pallet truck scales, crane scales, etc.

On request, KERN will make you a "tailor-made" weight carrier to your specifications.

16 DKD calibration service

page

DKD calibration service	147
Precision is our business (Range of calibration services)	147
DKD calibration service	147
Calibration service for balances	148
Calibration service for test weights	149
Recalibration of test weights	150

The DKD = Deutscher Kalibrierdienst (German Calibration Service) is responsible for measuring „correctly“ in accordance with legally binding international standards. It is part of DAkkS = Deutsche Akkreditierungsstelle (German accreditation organisation) which was founded in Germany. The basis is the European range of standards DIN EN ISO/IEC 17 000 for conformity assessment, in particular the accreditation standard 17

025, which governs the organisation of a calibration laboratory, as well as basic metrological technical requirements.

Only an accredited calibration laboratory can issue DKD calibration certificates. This defines not only the measuring method, but also gives information on tracing the test means to a national standard and the relevant measuring uncertainty is given.

KERN – Precision is our business

The KERN DKD calibration laboratory for electronic balances and weights has been accredited by DKD since 1994 and today is one of the most modern and best-equipped DKD calibration laboratories for balances, test weights and force-measurement in Europe.

Thanks to the high level of automation, we can carry out DKD calibration of balances, test weights and force-measuring devices 24 hours a day, 7 days a week.

Do you have any further requests or questions on this matter? We would be pleased to help you further, or why not visit us on the web at www.kern-lab.com

Range of services:

- DKD calibration of balances with a maximum load of up to 6 t
- DKD calibration of weights in the range of 1 mg – 500 kg

DKD calibration

- Why?** DKD calibration is always necessary when checking equipment (balance or test weight) is to be used in a QM process (e.g. to ISO 9000ff, GS 9000, TS 16949, VDA 6.1, FDA, GLP, GMP, ...)
- What?** Any checking equipment in proper condition can be DKD calibrated.
- How?** Determination of accuracy throughout the world by a laboratory which is accredited to DIN EN ISO 17025. Traceability to internationally recognised standards.

Calibrations can be carried out in the following classes: E1, E2, F1, F2, M1, M2 and M3.

- Database supported management of checking equipment and reminder service
- In combination with periodic recalibration we can offer you a wide range of further services:
 - Reconditioning of weights, e.g. cast weights (sand blasting, painting, adjustment,..)
 - Collection service with special transport packaging, even for heavy weights
 - Volume determination for weights of accuracy class E1
 - Measuring of sensitivity (magnetic characteristics)
- Calibration of force-measuring devices
- DKD calibration certificates in the following languages D, GB, F, I, E, NL, PL

The DKD calibration certificate confirms both the measurement characteristics of the checking equipment and the general requirements for the control of checking equipment.

- Where?** Internationally recognised – this is monitored by ILAC (International Laboratory Accreditation Cooperation) and in Germany, for example the DKD (German calibration service)
- When?** The operator controls the use of checking equipment and periodic recalibration time intervals themselves

Calibration service for balances

The advantages of using KERN in-house calibration

You send your balance to us.

To be recommended with new equipment and for balances which can be transported economically, as the travel costs for on-site calibration are then not applicable.

The advantages of using KERN on-site calibration

We visit you.

In Germany, KERN has access to a comprehensive network of employees at the KERN DKD calibration laboratory, who can carry out on-site calibration of scales up to 6 t.

The calibration service is **independent of the brand**.

Preliminary maintenance work by agreement.
Prices for on-site calibration on request.

Recalibration

- The recalibration schedule depends on the frequency of use, the conditions of use and the safety requirements.
- We would recommend that you recalibrate your test weights every 6 months if they are used intensively, and every 12 months with normal use.

Calibration of test weights

Calibrated measuring equipment requires calibrated checking equipment. For balances, these are calibrated test weights, also called "standard weights".

We calibrate test weights...

- in all OIML classes E1 through M3 with permissible error limits (for tolerance tables, see page 129), in sizes 1 mg to 500 kg.
- with free nominal value
- in Newtons
- independent of design (special designs)

The advantages of using KERN in-house calibration

You send your test weights to us.

- Excellent price performance ratio
- The quickest process time
 - standard DKD service: 4 working days
 - DKD Express service: 48 hours (new weights)
- The most modern calibration methods with robot controlled comparators) allow the most accurate calibration results and fastest throughput time
- A calibration service which is independent of the brand
- KERN also reconditions existing customer weights (e.g. readjustment or cleaning)
- We would be pleased to monitor your recalibration schedule
- On request, with our parcel service, we can also provide a pick-up and collection service
- KERN DKD calibration certificates are internationally recognised

The advantages of using KERN on-site calibration

We visit you.

We would be pleased to visit you within Germany and carry out the calibration of your reference standards to OIML classes M1 to M3, 10 to 50 kg with permissible error limits, using our mobile MACOS system. Minimized downtime of your checking equipment and direct contact with our expert are the major benefits of this service. Price on request.

Recalibration

- The recalibration schedule depends on the frequency of use, the conditions of use and the safety requirements.
- In terms of standardisation, no particular recalibration interval is specified.
- We would recommend that you recalibrate your test weights every 6 months if they are used intensively, and every 12 months with normal use.

Additional costs for preparation, overhaul and adjustment		KERN	Preis € o. MwSt.
Preparation of weights (e.g. cleaning, etc.)			
Single weight	969-001R	3,-	
Weight set	969-002R	16,-	
Subsequent services are carried out after confirmation			
Continued overhaul of weights (e.g. wet-cleaning, markings, repair, special packaging)	969-005R	T & M basis	
Adjustment, per weight (only available for weights with adjustment chamber (F1-M3))	969-010R	12,-	
Second calibration after adjustment per weight			
Class E1	969-210R	40,-	
Class E1 incl. volume determination	969-211R	80,-	
Class E2	969-310R	14,-	
Class F1/F2	969-410R	14,-	
Class M1-M3	969-610R	14,-	
Testing of magnetic properties according to OIML R111-2004, per weight	972-000	12,-	

KERN DKD-Express Service	
DKD standard service Class E2-M3	4 working days
DKD standard service Class E1, 1mg-500mg, and recalibration 1g-10kg with a known volume	15 working days
Class E1, 1g-1kg, incl. volume determination	25 working days
Class E1, ≥ 2kg, incl. volume determination	40 working days

DKD express service in 48 hours except for class E1	
<ul style="list-style-type: none"> • Urgent order is received at KERN by 12:00 noon at the latest • Ready for shipping at KERN on the next working day but on, at 12:00 noon • Return by standard parcel service or express shipping • Additional cost for DKD Express Service, for each KERN test weight KERN 962-115 € 20,- • For Express shipping, see page 148 	

KERN Glossary

▪ Adjusting of measuring equipment:

precise setting of a measure value via a professional intervention in the measurement system.

▪ Adjusting the weighing range of a balance:

either with the external test weight via the **adjusting program (CAL)**, or with the internal automatic adjustment resp. adjusting switch. It is necessary with variations in temperature, a change of environmental conditions, change of location, etc. **Recommended as a daily check routine.**

▪ Application accuracy:

Allowance for → *measuring uncertainty* during practical use of a balance. Is given in the appendix to the DKD calibration certificate.

▪ Calibration of measuring equipment:

determination of the precision of a measure value without intervention in the measurement system. Example: to check a balance you load a → *test weight upon it*. The term "Calibrating" was formerly also used for → *Adjusting*.

▪ Calibration or verification:

DKD-Calibration is possible for every balance in perfect condition. DKD calibration is a private service monitored by the state for ensuring high quality requirements according to ISO 9000ff and others, e.g. in production or research.

M Verifying is only possible for type-approved balances marked with the green **M**

→ Verification

▪ Calibration Certificate DKD:

documentation of measured characteristics of balances or test weights and of traceability to the national standard. Additional price. See pages 147-150.

▪ Capacity display:

a bar lights up to show the currently selected and optionally available weighing range.

▪ Certificate:

The term is no longer used within DKD

→ Calibration certificate

▪ Control of measuring equipment:

required for quality management systems according to ISO 9000ff, GLP etc. Measuring equipment (e.g. balances) and checking equipment (e.g. test weights) must be controlled (= calibrated) at certain intervals for their precision

→ Recalibration.

▪ Data interface/parameters:

For the most part RS 232C, bidirectional.

For direct connection of a printer or PC to the balance. The interface parameters can be set on the balance keypad. Interface cable, see page 126.

▪ Density determination:

(previously "Specific weight")

▪ DKD = German Calibration Service:

See pages 147-150.

▪ DMS = Strain gauge:

An electrical resistor strip that is glued to an elastic deforming body made of aluminium. As the strain gauge is mechanically deformed its resistance value changes, allowing the measured value to be calculated.

▪ Draught shield:

Required for balances with → *Readout d* ≤ 1 mg, to avoid disturbing air movements.

▪ Dual-range balance:

the complete weighing range of a balance is divided and starts with → *Readout d₁*. Beyond this fine range the → *Readout d₂*, usually 2 x *d₁*. The change-over occurs automatically.

▪ Dynamic weighing:

→ Filter

▪ External test weight (previously calibration weight):

for adjusting or checking the balance accuracy

→ *Adjusting the weighing range*. The external test weight can be DKD calibrated at any time, even afterwards, see page 149.

▪ Filter for adaptation to the ambient conditions:

vibrations are compensated due to an increase of the measurement cycles within the balance, this means an extension of the integration time.

▪ FORCE = Electromagnetic force compensation:

A counterforce is created by means of a coil in a permanent magnet. This counterforce is the same as the load of the weight being measured on the scale and therefore maintains the balance. The measured value is calculated via the change in the coil current.

▪ Gravitational force:

very important influence for precise electronic balances. Due to the varying influence balances have to be → *adjusted* at the location of use.

▪ GLP:

Good Laboratory Practice → ISO/GLP

▪ Internal test weight:

like test weight external, but installed in the balance and powered.

▪ IP 65 protection in accordance with DIN EN 60529

Designed for temporary contact with liquids. Use a damp cloth for cleaning. Dustproof.

▪ IP 67 protection in accordance with DIN EN 60529

Designed for temporary use in wet areas. Can be cleaned with water jet. Temporary submersion is possible. Dustproof.

▪ IP 68 protection in accordance with DIN EN 60529

Designed for continuous use in wet areas. Can be cleaned with water jet. Submersion is possible. Dustproof.

▪ ISO 9000ff:

Quality Management System in the form of a DIN Norm for quality assurance in a factory.

▪ ISO/GLP record keeping:

Quality Assurance Systems demand record keeping of weighing results and the correct adjusting of the balance giving details of date, time and balance identification. The easiest way of obtaining this documentation is by means of a connected printer.

▪ Linearity/precision:

greatest deviation of the weight display of a balance to the value of the respective test weight in terms of plus and minus over the whole weighing range.

▪ Manufacturer's declaration of conformity:

this documents that a product meets the EC directives. With electronic balances always in conjunction with CE mark.

▪ Minimum load Min:

lower limit of the verifiable weighing range. Is marked on the verification plate. The function of the balance is also given below the minimum load.

▪ Net total:

= total weight of all components of a mixture without the weight of the tare cup.

▪ Percentage determination (example):

reference weight prior to drying: 50g = balance display 100 %. After drying 40 g = balance display 80 % absolute (dry mass) or 20 % relative (humidity).

▪ Permissible ambient temperature:

measuring errors are possible with readings either side of the limits. With verified balances this is stated on the identification plate.

▪ Proof of compatibility:

This documents the verification compatibility for combinations of weighing modules such as display devices, load cells and connecting elements.

▪ Piece counting of single pieces:

when weighing e.g. 10 identical pieces; the

→ *reference quantity* is 10. The balance automatically indicates the average weight per piece. As from now each loading of identical pieces to be counted will be directly indicated as the quantity of pieces. The following applies: **The higher the reference quantity, the higher the counting accuracy.**

▪ Readout d:

Smallest readable weight increment on a digital display.

▪ Reference weight (when piece counting):

representative piece weight with piece counting of same pieces. The **reference quantity of pieces** is the number of pieces selected to determine the average reference weight. Mostly between 10 and 50 pieces.

→ Piece counting of single pieces.

▪ Recalibration:

periodic checking of the precision of measurement equipment/checking equipment (e.g. balances/weights) to keep control over accuracy,

→ *Control of measuring equipment.*

▪ Reproducibility (standard deviation):

the measure of conformity in repeat weighing (e.g. balances) subject to the same conditions. Mostly 1 **d** or less. Quality feature.

▪ SC-TECH = Single cell technology:

Advanced version of the classic electromagnetic force compensation principle. The load cells are milled from a single aluminium block achieving high mechanical strength, fast response characteristics and greater measurement stability, e.g. temperature behaviour and high reproducibility.

▪ Semi-micro balance:

analytical balance with a readout
d = 0,01 mg.

▪ Taring, subtractive:

the available weighing range of a balance is reduced by the value of the tare load. Example: weighing range of a balance **Max** 6000 g, Tare (= container) 470 g, available weighing range 5530 g.

▪ Taring, automatic:

when the tare pan is put in place the balance immediately displays zero. Saves time.

▪ Test weights: classes of accuracy E, F, M

and their general relation to the types of balances:

E2 the most accurate test weights for high resolution analytical balances of verification class I ≥ 100.000 e

F1 Precision weights for analytical balances/precision balances for verification class I/ II, up to 100,000 e

F2 Test weights for precision balances of verification class II, up to 30,000 e

M1 Precision weights for industrial and commercial balances of verification class III, up to 10,000 e

more closely defined rules to determine the correct test weight and example of application, see page 128.

▪ T-FORK = Tuning fork principle:

A resonating body (like a tuning fork) is electromagnetically excited, causing it to oscillate. The measured value is calculated via the change in frequency corresponding to the load of the weight being measured on the scale.

▪ Tolerance checks:

→ *Weighing with tolerance ranges.*

▪ Totalising:

various individual weighings are added automatically to aggregate, e.g. all individual weighings of a batch.

▪ Traceability to the National Standard:

ISO 9000 ff requires the correctness of all checking equipment (e.g. test weights) with the official standard in accordance to the defined tolerance. Thereby incorrect measurement is prevented.

▪ Uncertainty of measurement of a balance (= standard deviation):

determined for each balance according to a precisely given test method and documented in the → *Calibration certificate*. It depends on various factors both internal and external. With increasing weight the uncertainty of measurement rises, see page 148.

▪ Verification:

Only type approved balances can be verified officially. These balances are marked with an **M**. Verification is stipulated by the state for commercial trade. It is to protect the consumer.

▪ Balances which are verified / not approved for verification:

Metrologically almost identical. For verified balances certain details are regulated by law, e.g. software changes and additional markings.

▪ Verification validity for balances:

Generally 2 years for all verification categories, for control balances generally 1 year, after expiry the balance has to be reverified.

▪ Verification categories of balances:

Class I – Analytical balance (precision balance),

Class II – precision balance,

Class III – industrial scale (commercial scale).

▪ Verification:

According to the EU directive 2009/23/EG, balances must be verified if they are used as follows:

- a) in commercial trade when the price of a commodity is determined by weighing.
- b) in the manufacture of pharmaceuticals in pharmacies and analysis in pharmaceutical and medical laboratories.
- c) for official purposes.
- d) in the production of prepackaging.
- e) in medical applications.

Every balance is tested by the metrological service and stamped with a verification mark. Its accuracy within the framework of permissible standard tolerances is thereby confirmed. EU verification applies to all member states of the EU

▪ Verification of a balance with adjusting program CAL EXT:

the adjusting program is sealed with an official mark after the verification. Thus the verification is only valid for the specific location of use.

→ *Gravitational force*

For the preparation of verification it is therefore necessary to advise the location of use and post-code. See individual model details for the information as to whether verification can be carried out in the factory or at the location of use.

▪ Verification of a balance with automatic internal adjusting CAL INT:

the above restrictions in respect of the location of use do not apply, because the automatic internal adjusting works also after the verification, therefore it is not sealed. In this case the verification does not depend on the location.

▪ Verification value e:

measure of the verification tolerance, depending on balance, mostly between 1 **d** and 10 **d**

→ *Readout*

▪ Weighing range Max:

is the working range of the balance. The balance can be loaded up to the specified upper limit.

▪ Weighing with tolerance ranges:

the lower and upper limiting values are programmed individually. Input is possible in grammes, pieces or %. With tolerance checks such as dosing, portion division or grading, the balance displays the value over or under the limits.

Retailer information

Sales conditions

- All prices are valid as of February 1st 2011** until a new version of the KERN catalogue is released. In Europe, all prices do not include the applicable V.A.T.
- At KERN there is no minimum order value.** For orders less than € 15,- there is no re-sale discount available. A minimum fee of € 15.00 will be charged for orders less than € 15.00 (net).
- Delivery Conditions:** we supply ex works Balingen, i.e. the transport costs are invoiced. Delivery is usually via courier service, or by truck, when you see this symbol. Please ask for prices.
- 1 DAY** Any goods supplied, remain KERN's property until complete payment for the goods sold has been received.
- Legal domicile is** 72336 Balingen, Germany.
- Price changes and product changes** are likely in individual cases due to product modifications as well as error.
- Sale or return:** within 14 days of purchase. Not valid for services provided e.g. verification or calibration.
- Warranty:** 3 years, under € 400.00: 2 years. Does not apply to consumables such as batteries, rechargeable battery packs, etc.

Marketing support

- KERN catalogues, brochures, branch prospectuses – your own personalised marketing tools**

This catalogue and branch prospectuses are available free of charge. A neutral version of the catalogue, without the KERN address imprint, is also available for your marketing activities free of charge (200 pcs.), larger quantities on request. On demand, your company logo and address can be printed on the back of the KERN catalogue free of charge (200 pcs.), larger quantities on request. In this way you have your own individual marketing tool. The KERN catalogue branch prospectuses are available in the following languages: DE, GB, FR, IT, ES, NL, PT, RUS.

Further details, see page 2.

After-Sales-Service

- Repair services** within 1 week at our plant in Balingen, transportation costs are additional. In urgent cases, if requested by customer, a replacement device will be provided until all repairs are completed; please ask.
- Price reduction on a new device:** if repair costs exceed the current value of the defective device, a new device will be offered at a discount price. This offer is valid only up to 2 years after warranty expiration.
- Spare parts service** within 48 hours, transportation costs are additional

Important notice

Explosion hazard or humidity

Our balances are not suitable for rooms with explosion hazard or extreme humidity. Please observe relevant electrical instructions.

Earth's Gravitational force

Electronic balances are subject to location regulations due to the earth's gravitational force. If location of use is changed, reverification and recalibration of the electronic balance is needed.

See the glossary, page 151 → „Adjusting“.

Tradition and innovation for more than 167 years

1844

KERN is founded – precision balances are produced

1863

A proud Gottlieb Kern with his staff

1880

Pharmaceutical balance with Aesculap

1923

Inflation – KERN wages are paid with self printed currency

The electronic balance ousts mechanical devices

Accredited for weights DKD laboratory (ISO 17025)

New premises in Balingen

2002

Existing QM system certification in accordance to DIN EN ISO 9001:2000 standards

2007

Approval for the Manufacture of Medical Products (DIN EN13485 and 93/42/EEC)

2008

Approval for manufacturer's initial calibration (90/384/EEC)

Approval for the manufacture and sale of height rods (DIN EN 13485 and 93/42/EEC)

Expansion of accreditation services to include calibration of force-measurement devices
